Super Mario World 2®

Mario's back in his biggest adventure yet.

Four years in the birthing, and now this bambino comes kicking and screaming into the world of

Morphemation graphics. A Nintendo brainchild that allows

the characters and back-
grounds to ripple, rubberize and
react like nothing you've ever seen
(cept maybe that nasty gelatin salad
your mom puts out for company).

But there's more than eye-popping
visuals to drool over. There's over

Egg fights, screaming babies,
vicious attacks—it's like
day care from hell.

Do not adjust your
television. These graphics
are supposed to be heavy.

This baby's outta control.

60 levels packed with all-new surprises. Huge expanding bosses. And Yoshi — a cold-blooded baby sitter who spits fire and launches eggs out his butt. He even morphs into a helicopter...

try that with your average Lizard. And if that doesn't pacify you, there are over 130 different types of enemies. So, you may wanna put on a fresh diaper.

This little sucker doesn't just scroll left to right. He goes all over the place (and we don't mean Harbor Town).

Kicking, shrieking, crying, tantrums...and that's just the guys who bought new systems.

Only for

GOING OUT WITH A BANG

We're coming upon **A WHOLE NEW ERA**, it seems that every year something new happens in the industry to completely shake everything up. This particular situation is the release of the Sony PlayStation. This system has promised and delivered home video games that the general public couldn't even dream of more than a year ago. This release, coupled with the Sega Saturn and the much-anticipated Ultra 64, will undoubtedly

SET THE STANDARD for gaming, but for how long? The video gaming world is changing faster than most people realized or even anticipated and this will only lead to questions that few can answer.

All this leads to the headline, 'The Super NES and Genesis, the two perennial favorites of the world, are going out with a bang. As the Sega Saturn and PlayStation gain a stronghold on your minds and wallets, those **16-BIT WORKHORSES** are having some of the best games ever designed for 16-bit being released for them. Just take a look at Chrono Trigger, Yoshi's Island, Mortal Kombat 3 and the upcoming Super Mario RPG for the Super NES. Then there is Comic Zone, Vectorman, College Football USA '96 and the upcoming Earthworm Jim 2 for the Genesis. All these games represent the **BEST GAMES** that these systems have seen in a long time. But unfortunately, not many of you will be willing to play them once the PlayStation and Saturn become the main staple of your TV diets.

But that's not a bad thing. **CHANGE IS GOOD** and I'm all for these big-budget games with lots of flash and pizzazz, but if they don't offer the plain old fun that video games should offer, then what's the point? Games like Centipede or Asteroids had no plot. No princess to save or evil villain to slay. In fact, those games should be inferior to everything nowadays, but I found myself playing Asteroids and Centipede on GameBoy long after the review was finished. Why? **FUN!** How many games these days just let you sit there, shoot things, collect points and try to survive. You could probably count those games on one hand. I'm not saying that none of these upcoming PlayStation, Saturn or Ultra 64 games won't be fun, but I most certainly hope they don't rely on gimmicky graphics to sell themselves. That will only lead to disappointment.

In closing I'd like to say that I am all for 'change' and as of this writing, have pre-ordered a PlayStation. Many of you know about some stores' sales pitch of **TRADING IN OLDER 16-BIT GAMES** to get a discounted price on the PlayStation. I also took advantage of this incredible deal and traded in a whole slew of old games, but there were some I did not. Why? Because games like Herzog Zwei, M.U.S.H.A. and Thunder Force 3, still for the Genesis mind you, offered too much fun to give up. And if the PlayStation doesn't offer the fun I want in modern games, at least I'll have some old favorites to turn to when I need them.

We're changing the face of baseball. And it's gonna leave more than a few scars. We're talking mind-blowing 3D technology—Real Motion Control™. Where we've blended over 22,000 frames of animation with real player moves, for the most seamless, in-your-face action. And with over 700 MLBPA™ licensed stars and their stats, you'll be double-stealing, throwing smoke, and jacking them out of photo-realistic 3D stadiums. So while everyone else is crowin' about their polygon this and motion capture that, remember: Real Motion Control means ruthless, hyper-realistic action. Championship Sport's 30 Baseball. We got it. They don't.

Available on the Sega Saturn™ and the PlayStation™ game console.

VIRTUA FIGHTER'S SHINING PAST AND BRILLIANT FUTURE IS FEATURED IN THIS ISSUE.

Those polygon fighters from the arcade hit of the summer of '94 have come a long way. In this issue of *EGM*, Virtua Fighter's awesome past is relived through its soon-to-be glorious future. Check out VF for the 32X, which is said to be an almost exact translation. Plus, Virtua Fighter Remix for the Sega Saturn might be a little glimpse as to what VF2 will look like on that system. Although Virtua Fighter 2 is in the arcades, Santa will be bringing this game to store shelves. VF2 sports two new characters and textured-mapped graphics. The story begins on [PAGE 54](#).

"The Virtua Fighter Remix for the Sega Saturn has all of the original characters, astounding new texture-mapped graphics and more polygons."

FORMER CHICAGO BEARS COACH "IRON" MIKE DITKA TALKS WITH TEAM EGM!

Da coach is back... well, sort of. Team EGM interviewed the former Chicago Bears coach to find out what his future plans are and his opinion on the state of the NFL. Currently, Ditka will be in the coach's seat...for a video game! Digital Pictures has enlisted his services in their full-motion football game. Try to score as many points while avoiding the coach's wrath. No one wants to be on Ditka's bad side! However, sports fans didn't always see what happened on the sidelines. Check out what Da Coach had to say about his good side. The story begins on [PAGE 114](#).

"I wish I didn't fly off the handle as quickly as I did sometimes, but yet—you know—you gotta be who you are."

IT'S HARD TO BE CIVILIZED! BUILD UP A TRIBE TO DEFEAT OTHERS IN KOEI'S CIVILIZATION.

Feel like playing as a god? This Super NES game based on the excellent PC title will have you building a civilization from the ground up! There are a number of awesome options at your disposal, such as 14 tribes to pick from as well as customizing the world to your own specifications. There are a lot of details future rulers shouldn't overlook when creating a tribe. Don't forget foreign policies, city management, wonders of the world and the space race. No one ever said ruling would be easy! The story begins on [PAGE 142](#).

"To make a successful city, make sure all of its needs are met. Water, housing and troop supplies are important."

Mirrors... Leather

Dear *EGM*,

The video gaming world has a problem to deal with, and it's starting before the magical November of '96. Yes, it's that time that comes around every four years where normal bear and sneaker commercials are replaced by "Public Service Announcements" from presidential candidates. Only being 13 years old, I can't vote, and this is the only place I can be heard and get my point across.

But the problems didn't start with the presidents. Oh no, they had bigger problems to deal with: policing the Internet, rating video games, etc. It all started with the Senate, where I'm willing to bet that less than 10 percent of the members own a video game console or an Internet account.

It's going further than the Senate, kiddies! Presidential hopeful, Senator Robert Dole said, "One of the greatest threats to American family values is the way our popular culture ridicules them. Our music, movies, television and advertising regularly push the limits of decency, bombarding our children with destructive messages of casual violence."

This is a load of crap. You don't play MK3, then turn around and rip some guy's head off. You don't play Doom and then go outside and burn someone with a flamethrower. Of course not! Did the Oklahoma Bombing take

place because of anything in video games, the Internet, advertising, etc... Mr. Dole? I think not.

Video games and the Internet are just an excuse for all the bad things that are happening in the world today. Did Manson have an Internet account? Not even close. If Robert Dole is going to get anywhere in this election, he'd better keep his mouth shut about regulating the media. The only thing bothering people like you and me about the Internet and video games is the fact that people in the Senate and possibly presidents, who don't know anything about them and are trying to regulate them.

Keep all this in mind, all you out there who are old enough to vote

Curt Carlson
Miami, FL

That's beautiful, man. You bring up some valid points. Although this whole "anti-video" game thing has died down, I'm sure every presidential hopeful will drag this tired subject out of the pits of hell and get all of your parents on his side. What can you do about this? Well, if you're old enough to vote, don't vote for the leazy bum and crackle your friends out to. If you're not old enough, then it will be your job to inform your parents that video games are not evil and deadly devices designed to ruin your lives.

Great letter, Curt. Your Acciain Dual Turbo Joysticks are on their way.

YOU GET WHAT YOU PAY FOR. OR DO YOU?

Dear EGM,

I'm sure you get plenty of complaints (gee, thanks a lot! - Ed.), but mine is important. I own every issue of **EGM** and your changes are usually for the better, but how come your price went up four cents? I know it's not much, but issue 67 and every issue after that is smaller! Now, why would you raise the price and shorten the issue? Unless you lower the prices or expand the issue, I think I'll switch to reading GamePro! Okay, I'm done bashing your work. Now I'm going to complain about video game prices. I am a regular video game renter. I get the game for one dollar, one day. I usually keep a game for three days, which is long enough to beat even the hardest games like Breath of Fire, Earthbound, Final Fantasy 2 & 3, Y's 3, Illusion of Gaea, etc. I could go on forever. A few days ago, I went to buy a game. I saw the games I best in three days costing between \$40 and \$70. Why would someone pay that much for three days of play? That also shows that games are too short! "Over 70 hours of play," so what!

Cody MacLeod
Oakland, CA

Sorry Cody, I guess you're just too good to play video games. It looks like you should pursue a career in producing 32X waffle makers. Although there is no RPG waffle maker as of yet, you could help develop this new niche in cooking and video gaming. We're even pondering the idea of a new magazine called Electronic Gourmet Monthly. You'd like that wouldn't you?

• Is Earthbound way too easy? According to Cody, it most certainly is.

AWW GEEZ WALLY, NOT THIS AGAIN

Dear EGM,

First, I'd like to say as a subscriber for two years that the changes you've made are great (a wonderful way to start a letter! - Ed.), but I also want to reply to Brian Tellingsworth, who in the August issue giped about Nintendo's latest delay of their Ultra 64's release date. Nintendo has stated that the main reason they have delayed the release is to give third-party developers more time to develop their games and take full advantage of the system's capabilities. I don't think you'd be happy if the Ultra 64 was released now with only two games available. Remember the 32X? As I browse through my past issues of **EGM**, I notice that most 32X games received a less favorable review, and in almost all of them there is the comment, "This game could have made better use of 32X's capabilities." The 32X was brought out in a hurry and this is what they get. Sound familiar? I think Nintendo made a good decision three years ago to devote most of

their time to one system, and if it takes another year to fine-tune it, fine. I'm willing to wait just to get it for \$250. Nintendo used a similar tactic with the Super NES, biding their time while the Genesis basked in the spotlight. As a result, the Super NES is technologically superior to the Genesis. I hear about a new system almost every month, and it must be impossible, as a developer, to keep up. However, I agree with Brian that Nintendo is treading on thin ice by keeping us all in the dark. If they don't give us something soon, many will stop waiting and splurge to have the next generation in their greedy little hands

If four years still isn't enough to get it right, I'll grab my flaming torch and join the mob.

Robin Salkeld
Brampton, Ontario, Canada

Okay Robin, beside the fact that my fingers have blisters all over them from typing your letter, you do make some valid points. Nintendo probably realizes that they can lose some market share with the Sega Saturn already on the market, but based on the track record of the Super NES, I have no doubt the Ultra 64 can replicate that trend. Excuse me, but I now have to apply some bandages to my blood-dripping digits. Thanks to my Street Fighter II first Aid kit.

IT'S NOT THE SIZE THAT COUNTS

Dear EGM,

What the heck is wrong with Sega? I'm talking about those Sega Saturn cases in which they put the CDs. In Japan, they are nice little jewel cases that don't take up that much space. On the other hand, over here in the great 'ol U.S. of A., they are huge eyecores that take up a lot of space and are bulky. Why the heck are they doing this?

Matthew Hecke
Tacoma, WA

Well, surprisingly it's not a marketing ploy...yet. You see, since nothing else on the planet can hold these cases in one nice location, the regular CD organizers do, Sega must be thinking of a way to develop and sell one for the masses. However, if you want to remedy the situation now, run out to a record store and buy empty jewel cases (they're cheap). Then get out a pair of scissors and hack up the instruction manual and jam it into the new jewel case. Voilà! It ain't pretty, but it's fun to play with scissors.

• Sega dares to be different with their Sega CD and Sega Saturn boxes.

ASK
EGM

Q: Why is it when I leave a can of Cherry Coke on top of the TV for a week, and then try to pour it out in the sink when I clean my room, there is always something solid that oozes out of the can and splats into the sink?

David Tigre
Miami, FL

A: You know those cereal boxes that always proclaim "Free Prize Inside"? Need I say more.

Q: Why do dogs have to exorcise their anal glands, and why not us? I mean, Wags looks like he's really having fun when he's scooting across the floor.

Person's Name
City, ST

A: I must admit that I was going to put you into the Psycho Letter of the Month section, but then my dog did it as well. Congrats, you have just closed me in to a new thrill. Maybe we'll do a mag on sliding around. Anyway, they have to do it because they have stuff that builds up in those darn glands.

Q: I've been wondering about the meaning of life. I mean, what does it all end, where does it even start? I've been contemplating how the spheres of immortality twist and twirl about the cosmos like a child's kite. Since you profess to answer questions, ponder my query.

Tir Droq
mountain top, Tibe

A: That's a simple one, Tir. You see, the meaning of life is, oh, I'm sorry, we seem to be out of space.

BUT IT'LL SURE LOOK
PRETTY ON THE SHELF...

Dear EGM,

I am on the verge of purchasing a Sony PlayStation on its release date. I have heard rumors that it will be shipped with a pack-in game, while I also heard rumors that there won't be one. Can you tell me if there will be? If there is a pack-in, I will most certainly purchase a PlayStation. The price of the PSX is about \$299, and that isn't exactly cheap. If I spend \$299 for a new system and I don't get a game to play, I'll feel like I got ripped off. The price is expensive, but if a game is included, I feel it will be worth the money. I suggest the pack-in game be *Wipeout*, *Battle Arena*, *Toshinden*, *Tekken* or *Mortal Kombat 3*. Thanks for your time.

Luca Iacusso
Wolcott, CT

Dear EGM,

What you are now holding in your stocky little hands is an open letter to Sony. It contains a few suggestions for the new PlayStation. I have heard the rumor about the 16-Bit game trade-in. (It's no rumor - Ed.) I think it's a great idea. In just a random count on my 16-Bit video games, I found 10 games I would trade in for \$100 off a PlayStation. It would be nice if we could trade in our old 8-Bit systems and games. To pack-in or not to pack-in, that is the question. Frankly, I am a little shocked by the idea of not getting a game with the PlayStation. It may work fine in Japan, but over here we sorta expect a game when we shovel out \$299 for a system. It does make you look cheap in comparison with Sega. At the very least, you should pack-in Ridge Racer until Dec. 31. I'm sure you could eat the cost for four months!

Larry Madill, Jr.
Evansville, IN

I'm sorry to say guys, but it's true. Sony will not include a pack-in game with the PlayStation. They will, however, include a sampler CD that can be played on a normal audio CD player and in the PlayStation. It's called the Developer's Demo Disc. When it's in an audio player, head the opening and bypass track one, unless you want to experience what it sounds like inside a tug zipper. Track two has a shameless plug for the PSX while the remaining 10 tracks have music from Sony's heads. If you pop that same disc into a PSX, you get to try out nine interactive demos, set games, of the PlayStation's abilities. While it may be cool to putz around with a

fully rendered dinosaur or make texture-mapped cubes explode, my recommendation is to pick up a game, any game, since you will get bored at this disc in, oh, 10 minutes. Yipes.

• On the CD you can have endless fun playing with a Dino, at least according to Nikon Volkov.

WHO OUNT...
SUNSOFT OR ACCLAIM?

Dear EGM,

Recently, I received my August issue of **EGM**. I love your magazine and like the new format. However, I have a question about page 119 of this issue. It's an ad showing three new Looney Tunes games for the Super NES. At the bottom of the page I saw the Acclaim logo. I thought Looney Tunes games were distributed by Sunsoft? I rented Looney Tunes B-Ball and only saw the Sunsoft logo; the Acclaim logo was nowhere to be found. I also realized that Justice League Task Force had the Acclaim logo in the beginning, along with Sunsoft logo. What is going on with these two companies? Have they parted forces? Was the ad just a typo?

Jason Taylor
Rockwall, TX

Jason, the publishing end of Sunsoft went belly-up, and Acclaim was there to scoop up Sunsoft's remaining titles. That's why many games Sunsoft was originally working on, such as *Donkey-Kong*, *Porky Pig's Hunted Holiday* are now going to be released under the Acclaim banner.

• Acclaim picked up the rights to release every Sunsoft game, like *Scooby-Doo!*

A MYSTERIOUS MAN OF MANY QUESTIONS...

Dear EGM,

I have a bunch of questions to ask and I put them in a list so that it's easy for you to answer (that is, should you decide to answer.)

1. I would like to subscribe to **EGM** but don't know how. I bought several issues of **EGM** at the newsstand to see if there are any postcards in it, but there were none. Also, there is a page for subscribing to **EGM**, not **EGM**.
2. Do you have info on Erix's Dragon Quest (Dragon Warrior VI) and Nintendo's Tale Fantasia?
3. I heard that Killer Instinct for Super NES is missing SGI endings with voices, screen scrolling out on the bridge level, 3-D sky background, announcements of combos, etc. Will these be included when it comes out on Ultra 64? Do you have any info on KI 2?
4. Since you can use Super Famicom games on the Super NES, will this work for Ultra Famicom and Ultra 64?
5. On the back of every Super Famicom game box, it says that the game is for sale and use in Japan only. Does this mean that it is illegal to play Super Famicom games?
6. Do you ever get tired of hearing that your mag is the best?
7. Will Super Street Fighter II Turbo come out for any other platforms than 3DO and computer?

Name lost due to postal system
Long Beach, CA

Okay, mysterious man, here are go...

1. If you already subscribe to **EGM**, you should be getting a voucher asking if you would like to subscribe to **EGM**. Other than that, there is no other way to subscribe directly to **EGM**.
2. It's possible that Dragon Warrior VI will come to the States, but it's unlikely. As for Tale Fantasia, there are no plans to release it here at this time.
3. Although final details on this game are still shrouded in mystery, with Nintendo buying the Ultra 64 the way they are, the game had better be incredible, even if it is a cartridge-based system.
4. Unlikely, but it would be nice.
5. The police are on their way. Jerrit Klotzinger Nintendo doesn't like the idea, but it's not really enforced in the States.
6. No.
7. No plans have been announced for another rendition of this game, but when they do, you'll be the first to know.

PSYCHO LETTER OF THE MONTH

How far that part of the show where the truly insane get a chance to shine. This month's letter comes from Justin Swingshaver, who has a wonderful story to tell all of you...and here it is! Note that with the miracle of copy editors, the typed version (below) will read easier than the version on the right.

Dear EGM,

This has absolutely nothing to do with nothing but here's a little story I created in my creative and brilliant little mind.

One day there was a fancy little girl walking on the street with her friends...her friends. They were all having a dandy little time when a pesky little red squirrel spit on Rachel (the fancy little girl) and ran away laughing and saying, "Rachel has spit from a squirrel all over her dress!"

Then Rachel cried and all of her friends deserted her except for one, "What's the matter Rachel Merlin Swingshaver?" and Rachel's friend, "Are you all and 'cuss of all that spit and spit of over you? Well let me see here. I know! My sister Kelly needs some spare spit in a bottle...and look here! I have just the perfect little bottle just for scooping squirrel spit up in it." So Rachel's friend scooped up all the spit off her and ran home quick to feed Kelly! Well, the rest of this story is too long to explain so I'll just skip to the end. *oh, dem - E!*

Everything was n-o-kay but Kelly started growling fur and bask teeth after she drink the spit. Then five years passed and Kelly turned into a squirrel and she ran up and spit on Rachel Merlin Swingshaver and Rachel cried. The end.

Sincerely,
Justin Swingshaver

We are a true Psycho, Justin. Your T-Shirt is in the mail.

YOU DON'T KNOW WHERE THAT THING'S BEEN!

Dear EGM,

I don't know if you've noticed the growing trend in game advertising such as 3DO's ad saying, "We've got over 200 woody-inducing titles to play on it." Huh? Woody-inducing? Or Sony's ad for the PlayStation stating, "Is it the start of a wet dream?" Or how about Crystal Dynamics' ad announcing, "With all the high-tech weaponry your top gun wet dream can handle." I don't know about you guys, but I don't get, well, excited when I play video games

READER VOICES CONCERNS WITH ATARI

Dear EGM,

This is not another Jaguar-thrashing letter. Alan makes a good system. They should, however, leave the game making to third-party licensees. I think their attempt to make a fighting game was a failure. Of course, I'm talking about Kasumi Ninja. Did you see the ad? First, there were two stages advertised that weren't in the game. Secondly, it said you collect items after each battle to help you through a 3-D labyrinth. I saw no items and no labyrinth (unless you call a drooler run a labyrinth). Third, to beat the game you have to play the hardest level and know the secret to reach the actual last character. I could also go on with all the glitches, bad programming and no endings but I have to file a false advertisement suit. Later.

RIPS AND PRAISES FOR "THE BIG TWO"

Dear EGM,

I'm writing this to give Sega praise for their Virtua Fighter series. I've never been disappointed with any of these games. I'm a very big fan of the game Virtua Cop. There are only three levels, but they're huge and tough enough to eat my quarters before I have a chance to beat it. I like Virtua Fighter for the Sega Saturn too. That sound of Leu's leg slicing through the air is awesome in that three-punch roundhouse combo (you know what I'm talking about, Rush!). I think the sound on the Sega Saturn may be better than the arcade. Now to dump on Nintendo. I hate that stupid Virtual Boy. The concept is good, but the product sucks. It's not in full color like I thought it was going to be, and if it was any good, it would cost more than \$160 with \$40 games. I'm just judging the book by its cover but it

the cover reflects what's in the book, I'm going to play some video games.

**Mike Nash
Baltimore, MD**

To each his own I guess, but you should give the Virtual Boy a try. I myself thought I'd hate it, but now I find myself playing the darned thing for hours on end! Now if only they could reduce the system price to something reasonable...like under \$100.

This month's letter column was brought to you by Designer Carpenter, EGM Dealer-Killer-Demolisher-chickadee Javelin. We've contacted him to send his own personal fabricated touch to this section. He agreed most emphatically after we used shock therapy to beat his mind to our will. Despite drooling and internal rot, we figure that he's up to the EGM standards.

SEGA'S NOMAD TRUDGES ONWARD

Sega's production plans for its 16-bit handheld system (codenamed the Nomad) seem to be rolling right along.

According to published reports out of Japan, Sega has inked a deal with Citizen, the

to supply LCD screens for the system.

This new three "full-color" LCD display reportedly will have a higher resolution than the Game Gear and will be more in keeping with the Turbo Express handheld system from TurboGrafx.

Under the deal, Citizen will chum out 50,000 screens per month. That number suggests that Sega is confident the Nomad can be mass-produced, although no officials are willing to comment on the project's progress.

The Nomad, being developed by Sega of America, will be able to play Genesis games. One item being developed in conjunction with the Nomad is a four-player multiplayer cable. Also rumored to be in the works is an adaptor that allows gamers to play Game Gear games as well.

If all goes well for Sega, the Nomad could be in some select markets by Christmas and available nationwide in early 1996.

CAUGHT IN THE WEB Gaming companies join the rush to go online

Gamers have found a place to congregate where they can trade gossip and information with each other—the Internet. Their exploits on the Internet have not gone unnoticed by some of video gaming's biggest players.

With strides in computer technology—most notably faster modems and better graphics—the Internet is more accessible and is becoming more appealing to both video game players and gaming companies.

The growth of World Wide Web has been the impetus for companies to offer their own web sites.

These web sites can cost anywhere from \$10,000 to \$50,000 and up to get started and upward of \$5,000 per month to maintain.

"You've got to be on the Web," said Susan Baldwin, director of public relations for Catapult Entertainment. "If you don't have a web site these days, you're not plugged in."

Catapult, maker of the XBAND Modem, launched its web site earlier this year. Catapult's home page offers information for gamers seeking the inside skinny on the XBAND.

"We try to target the whole gamut who uses the Web," Baldwin said. "We caught the wave to get on the Internet because we know this is a

very important avenue to reaching gamers, so they can have an understanding of our product and what our company is all about."

It's a statement echoed by many video and computer game companies on the web.

A recent survey by Chilton showed that almost half of teens (11 to 18) use a computer at home, and almost 20 percent of those surf the Internet. Another study by Goldman, Sachs and Company estimates that by the end of this year, more than 9 million consumers will have access to the web—up from less than 1 million in 1994.

Most web site features have the standard fare: game reviews, new releases, tips, etc. But some sites

(especially ones from smaller companies) cover unlikely items such as company news, profiles of key employees and they even sell game-related products like hats, T-shirts, mugs and key chains.

Companies not yet caught in the Web, such as Squaresoft of America, are realizing web sites are quickly becoming the rule—not the exception.

"We're working on it [getting our own web site]," said Minko Frogus, assistant project manager for Squaresoft. "It's been on hold because of Chrono Trigger and [Secret of] Evermore coming out."

But when that wraps up, Frogus said Squaresoft will go full-throttle to "get as

much information as possible [online] and have a presence on the Internet."

Squaresoft already has an official forum area through Nintendo and America Online, but the company is aiming for its own stand-alone web site. Its sister company, Square of Japan, already has a full-fledged site up and running that showcases its new games in-depth.

In the meantime, the Web is home to a multitude of "unofficial" video game sites that focus on specific topics or fill in gaps left by companies without web sites of their own. But one thing is for sure: More companies are getting caught up in the web.

By the way... **NUKE**

No internet story would be complete without a shameless plug of our own World Wide Web site: <http://www.nuke.com>.

screen shots of your favorite new Sega Saturn and PSX games.

"Unlike other [web] sites...that focus on one aspect of the entertainment industry, we have a multi-interest site that covers movies, computers and video games," said Dave Hill, online programming director for NUKE.

"We've got it all in one place."

MAXIMUM SURGE PACKS PLENTY OF STAR POWER

Digital Pictures is back in the gaming fray, and it hopes to have a full-motion thriller on its hands. Digital Pictures has hired some well-known actors to make this year's crop of games for the PC CD-ROM and Sega Saturn fun to play, as well as have an interesting and innovative story line.

Baywatch beauty Yasmine Bleeth and Walter Koenig (best known for his role as Chekov in the *Star Trek* series as well as being featured in several other science-fiction movies and television series, including *Babylon 5*) both star in *Maximum Surge*, an action game set in the 21st century in the aftermath of a nuclear war.

Bleeth plays Jo, your sily and a mercenary hired to help hunt down the evil Drexel, played by Koenig.

Jo will defend you, destroy enemies and hack computers when you reach the control rooms of the energy-producing power stations controlled by Drexel. He's a power-hungry dictator bent on repopulating the world with androids and the person you must seek out and destroy.

The 90 minutes of video footage in the game was filmed in Hollywood and in Long Beach, Calif. William Messa directed the filming. Among Messa's most recent big-screen accomplishments was the creation of the spectacular train crash sequence in the box-office blockbuster *The Fugitive*. In addition, he's done special effects for *Rambo III* and *Under Siege*.

Messa's experience with action movies made him a natural choice by Digital Pictures to oversee the filming of *Maximum Surge*.

"In the past year, we have spent a good deal of time focus testing our games with our target consumers," said Tom Zho, president and CEO of Digital Pictures.

"We have listened carefully to what they told us and we have integrated their input throughout all aspects of our game development. This depth of research will enable us to deliver the games our consumers want, not the type of games we think they want. This year we are changing our focus and plan to deliver top-quality gaming experiences."

FIGHT IT OUT ON THE XBAND WITH THE KING OF FIGHTERS

Namco's WeaponLord is the first game to be made specifically for play on the Super NES and Genesis Catapult XBAND networks.

Namco worked extensively with XBAND representatives to make sure the game play will be exciting and keep the reaction times of the characters lightning quick.

WeaponLord will be the first game to feature an XBAND-compatible symbol on the outside of the product box.

Namco even went out and acquired the services of James Goddard, a well-known fighting game aficionado who some say is the world's best fighting game player.

Goddard, the producer and lead designer on WeaponLord, is a huge fan of the XBAND service; it lets players compete head to head through telephone lines. Goddard had worked on many of the original versions of the Street Fighter series at Capcom.

"We worked closely with them to make WeaponLord XBAND compatible. I used to travel around playing games with people, now I can sit in my living room [to play with people]," Goddard said. "The XBAND is fantastic and I've played more people in one month than I did in my entire three years of traveling around playing Street Fighter with people for Capcom."

"The best thing about the XBAND network is that it makes it easier for developers and we as producers to get real opinions spontaneously from real gamers. Positive or negative, the feedback is spontaneous," Goddard said.

3 QUESTIONS WITH

SAM PLAYER

Crystal Dynamics

ESGM: What type of games do you like to play?

Sam: I am a sports game fanatic—I was hooked on the old Acolade HardBall game on the Macintosh a long time ago. I had an intelligence when I was a kid and was a big fan of their baseball game. I skipped the 8-Bit era and went right to the Sega Genesis. I'm a big fan of the Madden and NHL series of games that took over my life.

What is Crystal Dynamics trying to bring to the sports gaming mix? Here at Crystal we've been very successful with Slam and Jam. We're trying to bring a combination of arcade-style game play with accurate simulations. We'll bring a good mix that will appeal both the arcade and the simulation fans.

What type of educational background do you have? I went to Wesleyan University and took English and psychology.

HOW GAMES ARE RATED...

The reviews that are published in EGM are compiled after each member of the Review Crew staff plays. Through the game in its entirety. The Crew then independently writes their reviews based on the quality of the product, playability and challenge (how long it takes to complete), and fun. Most reviewers' ratings are a 1 to 10 scale in relation to other titles available for the target system.

Mortal Kombat 3 for the PlayStation is as good a transition to a new era as any. The graphics are amazing, thanks to the arcade and the console just like I remember it. Some of the things that I used to do in the arcade because the real life has gone on and I don't have a drive back to the arcade. The controls being problems would be a while is a lot of things and a lot of things to be a lot of playing games. Everyone who likes it at the arcade should like this version as well.

Uh, Shang what? What did they do to the morphing ability of Shang? The skin and the things he did in the arcade. Other characters like the one, Oh, Shang, the graphics are good and the one, I almost forgot I was playing the arcade version. The graphics are nice, but the one, I almost forgot I was playing the arcade version. The graphics are nice, but the one, I almost forgot I was playing the arcade version.

I was very impressed with the quality of translation. All of the characters, sounds, and moves are very good. The graphics are nice, but the one, I almost forgot I was playing the arcade version. The graphics are nice, but the one, I almost forgot I was playing the arcade version.

I guess I couldn't escape the inevitable review. Well, it looks like it's very close to the original version. The graphics are nice, but the one, I almost forgot I was playing the arcade version. The graphics are nice, but the one, I almost forgot I was playing the arcade version.

MechWarrior! I've never really played any of the board games, so I really gotta try this. It's quite fun, and you can really get my head into it. I'm running around on a huge arena with a lot of options to choose from. It's a bit of a challenge, but I'm really enjoying it. I'll be sure to get it. It's a really fun game, and I'm really enjoying it. However, it's not the best I've ever played. It's not as good as some of the other games I've played. ROBOTICA

acclaim

category: release date:

Shooter Now

challenge: back-up:

Moderate None

Robotica has a cool opening that tells you the story and gives you a good idea of the game's advantages and flaws. The game has a healthy amount of levels and only adds to another dimension for the end and special ones. The objectives on the levels is always the same and there are no cutscenes. There is no save game and there is no way to save your progress even though you can power it up. The levels that do so are low and far between. It just didn't wow.

If companies are going to make more Doom rip-offs, they should make look at Robotica how to do it with some originality! Like, the controls as compared to the disappointment of the Doom rip-offs actually makes a difference in this game. Unlike other Doom-type games, you can think about strategies for the obstacles and design strategies and then use your control. You can actually play control like this game. Strategy, fun and control, imagine that.

Robotica is yet another Doom clone done. However, the developer's pretty good because not a lot of people on Kileak. The game is above the rest of the clones in terms of looking. The textures are more realistic than the others. The level design can be avoided with the help of the controls. The control was easy to use, and it responded well. Robotica is an average story. I would recommend the CD. It is fun—one of the better games of the genre.

This is a pretty decent Doom clone with a lot of what makes Doom great. The game has a lot of variety of weapons and options, such as a shield and the ability to hover. I wish the game broke down a little in the levels—especially start to look around. Also, I wish it would power up the guns by itself. The game is a much better Doom clone than the others. Overall, it's either cool and new, but I got bored due to the redundant backgrounds.

PITFALL

activision

category: release date:

Adventure **Now**

challenge: back-up:

Moderate **None**

As I played Pitfall for the 32X, I couldn't help but wonder why they didn't work on Genesis. The game is packed with enemies that are really hard to get by instead of the frustrate-a-loop control. A game like this should be picked up, enhanced, not packed in, left in the closet from 1982, or if I gotta be out of the corner, the controls, the simulator and graphics can't be that good, but there's no excuse if you liked the first version, you will like this one. It didn't change all that much.

What's the difference between this game and the Genesis version? I really expected to see some of the new 32X action. Some of the game is a good, but why is it only new? Why did it not from the a slightly inferior Genesis? Anyway, I liked the pace of the game. Do what you need to do with a minimum amount of time, and you're on. The new more video games could be designed this game play. I found no difficulty getting into this one.

Pitfall 32X suffers from the same problems as the 16-bit version—the character jumps, slides across a lot, making precise control impossible. This is combined with your enemies, also is sloppy. The graphics are good with a few touch-up here and there. The screen looks so a little blurry. Why? The low-res screen and 32X with sound, but if not for the graphics, would probably be a top play. Overall I'd say it's a good game used to the controls, you'll have fun.

This is much the same game as the Genesis version. Three months after touch-up and it looks and plays pretty much the same, opening up playability. Touching your direction and touch control, in a way that's almost a 100% improvement. The screen looks so a little blurry. Why? The low-res screen and 32X with sound, but if not for the graphics, would probably be a top play. Overall I'd say it's a good game used to the controls, you'll have fun.

The Virtual Boy tries its best as it shooter and concept and it's more of a game. The idea of being in a 3D world is really cool, and it's different from anything you've ever seen before. The idea is to shoot a ball into a wall or something and you'll completely destroy your way through it. It's a really cool idea, but it's not too hard to get back on course. I love the part where the little people are running around looking for shelter!

Over. After playing through a bit of this, stand back, look at something and try to remember the look of it. It's really good. I was impressed by Red Alarm. Honestly, the graphics are so well done, and the ball is so big, and it's so easy to see. The idea is to shoot a ball into a wall or something and you'll completely destroy your way through it. It's a really cool idea, but it's not too hard to get back on course. I love the part where the little people are running around looking for shelter!

This is a pretty cool, especially for a first-generation game. The graphics are decent, and the little enemies running around in 3D is really fun. The game play is well-paced with lots of options to explore, any player, and it's easy to see how to play in the Virtual Boy of your. I wish there was some more of the little people, and it's a little bit of a shame that you can't see them. But it's a really good game, and it's a really good game.

GALACTIC PINBALL

nintendo

category: release date:

Pinball **Now**

challenge: back-up:

Moderate **None**

I have always loved pinball games, and I was disappointed that they would have what it takes to make a good pinball simulator. I love the fact that you can choose your own level, and for the most part, the level is completely fair. The only thing that disappointed me was that the flippers don't respond as fast as they should, but since you're not timing down, you can just keep playing forever... or until your battery runs out! The Virtual Boy keeps looking better and better.

All new systems have 3D pinball games that supposedly exploit the hardware's capability. This game is a good example of it. It's a good-looking, colorful, and fun game. The graphics are not as good as they were, there are some really nice backgrounds to choose from, and it's a really fun game. I wish there was some more of the little people, and it's a little bit of a shame that you can't see them. But it's a really good game, and it's a really good game.

I was very skeptical about how good the Virtual Boy would do, but it's a really good game. The graphics are really good, and the sound is really good. The game play is well-paced with lots of options to explore, any player, and it's easy to see how to play in the Virtual Boy of your. I wish there was some more of the little people, and it's a little bit of a shame that you can't see them. But it's a really good game, and it's a really good game.

I really don't care for the "new portable system," so I was a little skeptical about how good the Virtual Boy would do. However, this game is really good. The graphics are really good, and the sound is really good. The game play is well-paced with lots of options to explore, any player, and it's easy to see how to play in the Virtual Boy of your. I wish there was some more of the little people, and it's a little bit of a shame that you can't see them. But it's a really good game, and it's a really good game.

"Mark Like A Dog" Sotix? The Q has recorded all of these rumors as potential reasons why Sony's main man on the PlayStation account took a hike and jumped ship to Spectrum Holobyte, although yours truly thinks it has more to do with whipping Qlat at Ridge Racer. Now that the PlayStation is being bundled with Ridge Racer for 350 claims, Sony has a more attractive package, but how badly will the higher price affect sales? Need I remind people that Sega and Nintendo couldn't sell their next-gen systems for 300 bucks back in '97?

...It looks like 3DG may have some luck left in it after all. The Q-Minn has learned from sources at a number of companies that one 3DG supplier will likely have the 3DG upgrade, known as the M2, on store shelves next spring for around \$150. There are also rumors of another price drop for the next-gen system come X-Mas time and see the machine clock in at less than \$200. Yours truly has also heard from sources close to another 3DG hardware maker that it is very possible that a 3DG/M2 "all-in-one" console could go head-to-head with the Ultra 64 next April, punching in at the \$300 level! With fantastic quality and backward compatibility (i.e., lots of games already out for 3DG), such combo hardware could be a potent player in the 32-bit sweepstakes. In other M2 news, EA is rumored to be planning versions of both John Madden Football and PGA Tour Golf for the 3DG upgrade, despite earlier claims that no such development would take place. My Q-Sources have indicated that EA, as well as other companies such as Capcom and Accolade, are watching the marketing strategies of 3DG carefully after being impressed by the capabilities of the new chip set.

Hey editors, don't close the door on the 3DG just yet! The Q has seen their Q3D4 game lineups and they are BIG! Look for Killing Time, Phreal Rage and Blade Force to name just a few. MK3 will also get the 3DG treatment and hit stores by the middle of next year (nearly a year after Sony gets their exclusive shot to debut the MK sequel on their platform). What a steal! The Sage Nomad is quite a cool machine, with a display that is closer to the TurboExpress than the Gear Plus you get to play all your old Genesis carts—what a great place to put them after you buy your Sega Saturn!

Nintendo Ultra 64 gossip is running quicker than the Colorado rapids, but the Q-Minn has been able to get some new info. Word has it that Nintendo's stab at a next-gen super system will be released in Japan sometime between Dec. 1 and Dec. 21 of this year. The Ultra Famicom's '95 release (as it will be known on those shores) could be scratched altogether, however, in favor of possible simultaneous release in Japan and the U.S. due to a lack of software. Seems that the only new sofa that will be ready by December are a new Mario title and Cobra, the 3-D flight sim that Paradigm has been working on. Expect more clarification after the Showstool Show in Japan late next month. In other Ultra rumors, word has it that Nintendo will do a Super Famicom trip on their Ultra machine by launching it into Japan with only one controller. The sticks are designed so that both light and drivers can be played, as well as more standard fare. Expect to find six buttons (with four on the front of the pad) and joystick functions. The Q has an updated list of sofa for the Ultra that includes Ultra Mario Kart, Donkey Kong Fantasy, Killer Instinct 2, Mega Man, Street Fighter, Golden Eye, Final Fantasy VII and Ken Griffey Jr. Baseball.

...Staying on the Ultra subject, the Q-Minn has learned that Nintendo is continuing to visit the CD-ROM issue and is looking for ways to build the machine with such an upgrade in mind. Although the machine will definitely begin life as a cart-overloader, it seems that a group of Nintendo engineers are interested in exploring the idea of either an upgrade or a hybrid unit to address some of the concerns of software publishers who are balky at Nintendo's cart purchasing terms. With more than one licensee burned with excess inventories of game packs, Nintendo is attempting to find a way that will allow less risk and larger rewards for their software supporters.

IBM Multimedia Studios plans to make games for the Sony PlayStation. Expect the company's list entry, Quest for Fire, to let our guitar movers hit the stage with Aeorath. Using a device called a V-pick, you'll be tested to see if you can keep the beat to all of your favorite tunes. Other games will follow, possibly including The Adventures of Hyperman. The guy ain't your average superhero, but he will be appearing in a CBS Saturday morning cartoon this fall and will make the jump to the PC CD and the PlayStation. Speaking of cartoons, I can't wait to try out Earthworm Jim. I only hope he's closer to the Tick than previous "toons based on vid game characters.

accessible. Whether or not the Ultimate Kombat code will be that way or not remains to be seen. The combos we have all learned are also included, though some of the air juggles are a bit harder to pull off. The only really

noticeable difference would be the access time between the matches. That is a pretty small price to pay considering everything else is completely intact. If you've been reading **IGN** then you know that Kitana and Scorpion are returning to the game as well as some others. Unfortunately, they will not be appearing on the home systems. There is a rumor, however, that a memory card may be released in the future that will allow all the new characters to be played on the PSX. One can certainly hope for that.

Kitana

Here it is! One of the most eagerly awaited titles for the PSX. It is looking better than ever and wowed everyone here. It is an almost exact duplicate of its arcade counterpart. The graphics are unchanged and everything that you have learned from playing the arcade is in this version. Smoke is alive and

well, although I'm not sure on how to make him

Ultimate Kombat

All the fatalities are intact as well as friendships and other special moves you see in the arcade. This version is not easy by any means as the

It's too bad we probably won't see this on the home systems any time soon. This should keep the old MK2 Kitana fans happy for a little while—at least for now.

harder difficulty levels provide an enormous challenge. Since the PSX's controller has multiple buttons, all the buttons are intact and the controller has a good feel. Combo and such are fairly easy to pull off. An arcade stick makes the game a little easier since it gives more of a feeling of being at the arcade. The stages are all intact, including all of the background fatalities. There doesn't seem to be a spritz of difference. All of the secret button combinations have remained including the

elusive Galaga game as well as some of the other, cooler ones like random combatants. I think most will enjoy this as much as the arcade.

ARE WITTING HOME

STREET FIGHTER THE MOVIE

WHY STRAITS HOME

Most fighting game fans have developed their love of fighting because of the original Street Fighter II game. This game has spawned many wonderful games including Mortal Kombat. After lots of upgrades to the original Street Fighter II game, we have a fairly new idea. While this game has been in the arcade for quite some time now, with the advent of better CD systems, we can now have graphically advanced games. It would be an extreme challenge to

convert this game to say the Super NES or Genesis. This game is a lot like its arcade counterpart with a few major differences. There are all-new backgrounds and two new characters. The hidden Blanka, who is rumored to be

playable in the arcade, is now playable on the Sega Saturn as well as Dee Jay. They add a little more favor to the game. Blanka is the only character missing from the arcade version. Some other differences include the deletion of some of the animations.

HOW'S IT?

There is a Story Mode which follows the plot of the movie with lots of full-motion onemas directly from the film that are of fantastic quality. Also, it seems that the major combos have been done

away with. The new special moves from the arcade and the red super combos for the characters are also gone. The new backgrounds are really detailed and if you look closely at Blanka's stage you can see that Dhalim from the movie is there. All the characters retain the moves that made them famous. E. Honda's Hundred-hand Slap and Ken's famous Flaming Dragon Punch are there. When you beat your opponent with a super combo, instead of an exploding life bar, you get the explosion that was in SS2T. Playing Street Fighter with digitized characters instead of the cartoons that we love is definitely different. Playing

this one on a controller is a little more difficult than Mortal, but you do get used to it. The super combos are just as effective as ever, wiping out tons of life on your opponent's bar as well keeping them away. Fans of the genre should find this one enjoyable. The PSX and Sega Saturn are on the move and these titles are just the icing on the cake.

SPECIAL FEATURE

The original Virtua Fighter from Sega started out at the arcade the summer of '94. With the release of the 32-Bit home systems, it made its way to the home system. It started out as a pack-in for the new Sega Saturn, but now it is being released for the Sega 32X. As well, for everyone who purchased a Sega Saturn before Sept. 30, 1995, they will receive a free copy of Virtua Fighter Remix, which has updated graphics and more polygons.

32X

For all of you 32X owners who have been wondering about Virtua Fighter for your system—stop wondering, because it's here. The 32X Virtua Fighter is identical to the original in every aspect except some of the music has changed. As you can see on this page, the graphics haven't changed and the disappearing polygon problem of the original Sega Saturn version has been improved. The three-button Genesis controller isn't as responsive as the Sega Saturn's, but it still plays very well.

THE 11th HOUR

THE SEQUEL TO
7th GUEST

The 11th hour is the sequel to 7th Guest and has twice the full-motion video, puzzles and a broader story line than its predecessor. It also features a fully explorable mansion with 22 different rooms. The 11th Hour returns players to Henry Stauf's haunted mansion 70 years after the conclusion of 7th Guest. As reporter Carl Denning, your mission is to search for Robin Morales, your colleague and lover, who disappeared while investigating a string of murders in Stauf's hometown. As your search goes on, the horrifying truth behind the town and the house itself is revealed through the completion of puzzles and treasure hunts. This game will be available on PC CD-ROM, MAC CD-ROM, 3DO, Sega Saturn and PlayStation.

HEART OF DARKNESS

In the tradition of *Out of This World* and *Flashback* comes *Heart of Darkness*, an all-new adventure that combines the worst of every child's fears and a flawlessly rendered world. In this interactive adventure, players will find themselves fighting their way through this world trying to beat all seven levels of high-intensity game play. This new title also boasts high-caliber animation and a fully orchestrated soundtrack composed by Bruce Broughton, whose credits include *Miracle on 34th Street* and *Tombstone*. This game represents the new benchmark in animation and interaction. You can interact with everything that is visible, leaving the game open to infinite possibilities. *Heart of Darkness* will be available on PC CD-ROM.

TOON STRUCK

Toon Struck integrates painted backgrounds and live-action video to create a *Who Framed Roger Rabbit?* effect. At the beginning of the game you are introduced to Drew Blanc (played by Christopher Lloyd), a burnt-out Saturday morning cartoonist. Drew's unsympathetic boss demands that he come up with a cast of bunny characters for a new show, and he wants them by morning. As he attempts to create the new cartoon, a strange series of events suck him into this cartoon world, and while it seems happy on the surface, all is not well. A civil war is brewing between the good and evil cartoons and to get back, Drew and his buddy Flux Wildy must solve puzzles to outwit their enemies. *Toon Struck* is available on PC CD-ROM and Mac CD-ROM.

A scheme of betrayal and ambush will unravel as the game goes on drawing you deeper into the mystery. This game will be available on PC CD-ROM and MAC CD-ROM.

AGILE WARRIOR F-111X

Agile Warrior: F-111X is an arcade flight shooter where you are in control of an F-111X fighter plane and are right in the middle of some really dangerous missions. Players will become members of an elite covert squadron that is sent to hot spots around the world to eliminate threats. If you fail one of your missions, the enemy's chances of success increase, so it is essential to complete every mission successfully. The missions come in a random order to keep you guessing and alert. This game will be available on the PlayStation.

Although I am not much of a fan of shooting games, Virtua Cop 2 is a game I really enjoy playing. Just like Virtua Cop, Virtua Cop 2 has crosshairs around the enemies, two-player simultaneous, the ability to get powered-up weapons, and my favorite, the exploding barrels. Virtua Cop 2 has two levels of difficulty and three characters as opposed to the original's three levels of difficulty and two characters. One of the nicest features of the game is the engine that runs the game. The scrolling through the levels is as smooth as silk. I didn't even notice any slowdown when multiple enemies appeared on the screen. Overall, if you were a fan of the original Virtua Cop, or even have not even played the original, I recommend giving it a try.

—Mike Diamond

VIRTUA COP 2

Keeping your eyes peeled and being constantly aware are two of the key elements of this game. The enemies attack you from behind crates, high in the buildings above—even from a moving car in front of you. You better be ready to shoot quickly and reload constantly to progress in this game.

Virtua Cop 2 is not lacking in the Destruction Department. You can use stationary objects in Virtua Cop 2 to your advantage. By repeatedly shooting at barrels, you can make them explode and kill multiple enemies. The same technique can be used throughout the many levels.

AERO FIGHTERS 3

Aero Fighters is an "above the action" view shooter. The graphics are mediocre, not spectacular. But they don't need to be. The action is fast-paced, and the bombs look awesome!

ARCADE ACTION

PULSTAR

This is the shooter to end all shooters. Just like in R-Type, you have an option, which can either be launched, or connected to serve a special purpose such as diagonal firing. The Bosses look incredible!

METAL SLUG

Metal Slug looks very unique to say the least. You move your tank around blowing up or running over whatever stands in your way. Excellent graphics!

PUZZLE DE PON

Don't laugh—it's time for an awesome horse-racing game. This game is very simple, yet very original (name three horse-racing games), and really fun, too!

PUZZLE DE PON!

This update for Bust-A-Move adds some new challenges to an old premise. Many new levels await—not to mention new objectives to reach! See if you can master them all.

I know, it's not a fighting game, it sucks. However, SNK's "Gamers' Day" showed us what I hope will be the future of Arcade Games. (Namely, the death of fighting games—YEA!!!!!!) I was still reeling over KOF '95, however, when I see what looks like R-Type 4 (which is actually the kick-ass shooter Pulstar), Aero Fighters 3 (another shooter though not as good as Pulstar), a pretty cool horse-racing game (Stakes Winner), an update to Bust-A-Move called Puzzle De Pon, and best of all, a remake of one of the best arcade games of the "Golden Era", Mr. Do! Every game there was impressive to say the least. The most recent one SNK plans to release will probably be Pulstar, however, all six games will most likely come out by Christmas. Shooters have been around for years and there have been many variations of them. In the beginning there was Asteroids and Space Invaders. Then evolved the side-scroller Defender. Since then, shooters have been commonplace in local arcades (even before fighting games). Viper Phase 1 is a shooter similar to Raiden in that it is a vertical-scrolling shooter and you must battle star destroyer-type ships in a space environment. Also, as in most shooters, by shooting certain enemies and/or complete waves of enemies, you receive power-ups. Mid- and End-Bosses are quite difficult, but can be reasoned with. Overall, for those who are shooter fans, give Viper a try.

Many of you might not have seen trackball controls for almost 10 years, but they are coming back onto the scene with Orbatak. Using the Trackball, you control one of six characters trying to demolish each other. You and the opponent face off and attempt to force each other off the edge or smash each other until the sphere breaks and then "squashing" the character inside. The sounds of the orb hitting each other are quite cool, but the voice itself can get annoying after a while. The sound of one orb "squashing" the characters is a great addition to the game. The best thing about this game is that it can be played by young and old, novice and master game players. For a unique gaming experience, give Orbatak a whirl.

—Mike Desmond

ORBATAK

Orbatak allows you to set the difficulty at the beginning of the game. Although you can set it to easy, it isn't. The computer can be quite difficult to defeat.

There are various levels in which you must either knock your opponent

To win the game, you must win two out of three battles. It's not as easy as it sounds, though. Depending on the battlefield, you must either knock your opponent through the goals or just deplete his energy. Once his energy is gone, he morphs from a sphere to his normal creature state. If your opponent doesn't re-energize in time, you can simply run him over.

With the varying battlefields and creatures to battle, you must change your strategy depending on who you are against and placement of the goals, if any.

4 GAMES PREVIEWED!!!

INTERNATIONAL NEWS

Recently folks, this is Andrew Boron once again trying to root up the latest and greatest softs. This month there are a great deal of Sega Saturn games, most of which are from Sega themselves.

Sega is in the process of converting a lot of their arcade titles over to the home systems, looking to snag the arcade dwellers. Hang-on GP '95 is a remake of the classic motorcycle game that uses polygons. It should be out around October. Sega Rally (another Sega racer) is out to hit shelves in December.

If these games do well overseas, it doesn't take a psychic to predict that they'll probably appear here quite soon. This should give the Sega Saturn a boost.

So relax and enjoy...

Sega is hard at work translating Sega Rally, their rough-and-tumble arcade racer. Using the visual effects of the Sega Saturn system, players can experience the off-road thrills of the coin-op. There are three tracks to tempt the daring.

Sega Rally will be ready around Christmas, and promises to hold true to the original game in terms of strategy. Special effects like drifting around turns and being able to drive on the shoulders make SR an effective translation.

While the graphics aren't final yet, the engine and car movements are. There will also be additions to the Sega Saturn, like something called a Family Mode.

Watch your speed around the turns, or you'll fly off the track.

Sega Rally is twice as intense as Daytona, but uses a more advanced engine.

You have to cross the checkpoints in order to gain more time to finish the race.

SCREW the Prime Directive. If it's on radar, it's toast.

Intensify 3D action-mapped arenas of off-the-wall combat. Conquer and conquer. Conquer.™ (TM) (c) 1999 Sony Computer Entertainment Inc.

Screen through 22 different rounds of non-stop destruction. Remember the way you felt the better you feel.

Featuring new Sony Game option controller 357 hand-off capabilities and life-saving jump-ups.

Forget about that intergalactic brotherhood CIAD. 'Cause with **Total Eclipse Turbo™**, the space-combat simulation for the Sony PlayStation™, there ain't a heapin' helpin' of hospitality for light years. And with all those squid-faced aliens stopping in to party, you're gonna have to fire up your wicked welcome wagon and get this 32-bit block party blazing.

Formula 1 Live Information (tentative title) is a racer that is supposed to bring the thrills of the real thing home. It'll feel like you are watching a broadcast of actual races. On the top right of the Game Screen, a live report is given of what is really happening, as you brave the twisting polygon tracks. TV announcers from Fuji TV (well known for announcing F-1 races) will lend their voices to the game.

Formula 1 Live Information has several courses, from Monte Carlo to several original tracks. If you want realistic F-1 thrills, this Sega Saturn CD has it.

Godzilla, the king of monsters, is about to make a carnage-filled path to the Sega Saturn. Produced by Sega of Japan, Godzilla puts you in control of the Defense Forces as they try to protect the city against the onslaught of Godzilla, Mothra and Ghidorah.

Godzilla uses lots of special effects, so you can see the city fall apart around his scaly feet. If you're a Godzilla fan, this CD is sure to send you into a frenzy.

The bar on the side of the screen holds important information for the level, such as Godzilla's health, the amount of damage done to buildings and surrounding terrain and other tasty tidbits.

Romancing Saga 3 is the latest role-playing game from the masters at SquareSoft. Like the previous Romancing Saga game, this offers non-linear game play, letting you pick and choose which adventures to set out on. The world of Romancing Saga is a large expanse.

Characters will gain the powers of Fire, Wind, Earth, Sun, Water and Moon. Hopefully Square will consider releasing this series in the States, as it is a game worthy of their most excellent lineup.

Like most Square RPGs, this cart is outstanding.

The graphics are similar to Secret of Mana.

Similar to the second NES Godzilla game, players must guard the city from the rampaging rubber movie monster.

PLAYER'S NOTES:

FIRST IMPRESSION

Ho! it's great! Far be it from me to applaud the average Sega game, however this is not an average game by any measure! Clockwork Knight 2 has some of the coolest side-scrolling game play.

BEST FEATURE

The whole foreground-background hopping thing is just great.

WHAT'S MISSING

More stages! After an invigorating play-through of the one, I was left somewhat disappointed by the missing two or three stages I was expecting. Oh well, it's a great game nonetheless.

WILL YOU LIKE IT?

If you like side-scrollers, you will like it. If you like texture-mapped graphics, you will like it. If you enjoy great game play and control, you will like it. If you are a breed of coon sponge, you may have some difficulty appreciating this one.

—Jason Street

COMING TO THE U.S.

FRONT TO BACK, BACK TO FRONT

In many of the stages, you can travel back and forth from foreground to background. Most of the time, you can do this by using a cannon as means of transportation from one horizon to the next.

On stages where the Clockwork Knight must ride his loyal steed, you can cross over using a form of "exit ramp."

In each of these ways, the Clockwork Knight has arrived upon a very fresh and interesting implementation of the side-scrolling playing style.

Of course, this effect looks absolutely astounding!

In addition to its impressive visual qualities, this ability to jump about from back to front contributes to game play.

WITH THIS GAME, IT'S ALL IN THE CARDS

Each of the stages in this game contains cards, which if you run past them, will be considered "collected." Depending on how well you collect these cards, your long-term game will be affected. Much like coins or rings from familiar company mascot games, these cards can lead to bonus games or other unknown nifty stuff. Most of the stages have only four of these to collect. However, most of the time the last few are hidden. Somewhat difficult to locate at times, these cards are guaranteed to prove worth your time in the end.

POLISHED AND READY TO GO... AGAIN!

Like its predecessor, CWK2 has some of the most realistic side-scrolling graphics yet. Help guide the Clockwork Knight through several entertaining and visually impressive stages. Collect the cards, and continue your quest through to the end. Brace yourself for some hot game play!

Compared to stages ahead, the Child's Room provides mild challenges. Part two involves a high-speed racetrack sequence, full of great graphics and hefty challenge. The Boss here is a riot, jumping from left to right and screaming like James Brown.

The Study provides some of the most impressive effects found in this game. Most of this stage, you must bound back and forth from foreground to background (see the first page of this Fact-File), collecting icons and searching for the cards.

In the Bathroom, you must combat both the enemies and the stage itself. Every so often, the water level of the nearby bathtub will rise, causing overspill in the foreground. This effect is harmful. Stay on your toes, jumping from rubber duckies to nearby platforms!

GAMBLING FOR GOODIES

At mid-points between most stages, you are provided the option of playing a gambling game. Well, with acute vision, it's not really much of a gamble. Playing a kind of which-shell-has-something-underneath-it game, you can gain several beneficial goodies.

MEETING LARGE OBJECTS

Eggs, stunned enemies and even some background trees can be hefted. If you know what you are doing (such as throwing an egg at a row of approaching foes), you can clear obstacles quickly or get some useful icons.

MOST WANTED FIGHTER

The Cybster is...

back again with another batch of painting goodies.

Being a really big RPG fan, I recently attended the GenCon show in Milwaukee. Much to my surprise, I found out that White Wolf and Capcom were teaming up to do a game called *Wetworld: The Apocalypse*. It will be released sometime in '96 for the PlayStation 3rd Sega Saturn. I also stopped by the Koon booth to say hello to some friends who were joining people with Civilization. Needless to say, I bought lots of cards and a bunch of new Shadowrun books.

Hot news! Interplay has sold the 32X version of *Blackthorne* to Sega!

Capcom has a new game called *Marvel Super Heroes: Thanos' Quest* for the Super NES.

Playmates will not be releasing *WildCATs* for the Sega Genesis.

Earlier this month, we saw two of our oldies out to Capcom so they could get the best scores on their new games. They found one game that deserves special mention. It's called *Resident Evil*, and it will be released for the PlayStation. Similar in style to *Akuma in the Dark*, the small preview we got was enough to tingle my spine. Look for it in this Next Wave.

You'll notice a lot of 3DO games this month. There sure seems to be a whole bunch of them coming in. It seems like the 3DO is getting its second wind.

Here's what we could find, hope you have fun reading it.

Resident Evil is a chilling adventure in a haunted mansion.

LG Electronics

Primal Rage

3DO

Fighting

Now for the 3DO system is *Primal Rage*. PR, as you probably know, was originally an arcade fighting game that used digitized characters. Now the home translations are on the way.

LG Electronics has finished the 3DO version and it is a very close translation. The only noticeable difference is that the characters are really small. Oh well, it's a tradeoff for being able to play it at home.

Primal Rage is your basic one-on-one fighting game, despite the prehistoric cast. Each of the characters has an assortment of normal and special moves. At the end of the match, a finishing move can be done to eradicate your foe.

The graphics are close to the coin-op, and the audio is perfect. The control is somewhat complicated, but quarter-fingers should be used to it.

Primal Rage is one of the high-profile fighting games for the 3DO, and it's not too bad.

Gizzard gets chomped on by his opponent. Can he best Vertigo?

Disho fights a clone of himself in vicious two-player combat.

Isla (a raptor) and Armadoe are two of the most unique fighters.

Primal Rage for the 3DO is a very close translation. It even has modes set found in the arcade, like the *Tug-of-War*. That's where you share a life bar!

NEXT WAVE

Batman Forever

Super NES

Action

Hard-hitting action is what you'll find in *Batman Forever*.

The Dynamic Duo has a series of special tools that can be selected.

Batman Forever offers two-player simultaneous play. You can be Robin!

Batman Forever is a side-scrolling action game based on last summer's blockbuster film. *Batman Forever* has been digitized a la *Mortal Kombat*. The real stuntmen from the movie were used...believe it or not.

The premise behind the game is that Batman must thwart Two-Face and the Riddler who wish to control Gotham City. Each enemy thug has his own fighting style. Batman has a variety of punches and kicks, he can use, along with items like the Batarang, which are stored in his utility belt.

Batman Forever uses some interesting special effects, but it will have to back it up with game play in order for it to be a winner.

Alien Virus

PlayStation Adventure

Alien Virus is the latest interactive adventure from Vic Tokai. Set in the far future, players must travel from location to location collecting items and using them to solve the puzzles found throughout.

Alien Virus is pretty much like a lot of the computer adventures out there. In fact, it looks like a PC game. This title will be for the PlayStation, hence the realistic graphics.

While the plot details are sketchy, Vic Tokai is known for creating games that draw you in. We shall see if Alien Virus is a hit.

For games like this, it's a matter of knowing what to use and when.

Search each room with a flea-tooth comb. Who knows what you'll find.

Alien Virus is one of the few adventure games on the PlayStation.

Capcom

Mega Man X3

Super NES Action

The long-running Mega Man series continues with Mega Man X3. In this latest addition, the titanium Man must once again fight evil robotic forces and assume control over their powers.

Capcom has been steadily extending each Mega Man game by making each adventure non-linear. This cart is no exception. In X3, players will be able to customize Mega Man, allowing for vast differences in playing style.

The Mega Man series has always been top-notch. This game is loaded with secrets and techniques. Mega Man fans rejoice!

For a short time, you have to control Zero and rescue Mega Man!

The bosses of Mega Man X3 are giant thanks to the C4 computer chip.

This installment is the Mega Man series changes each time you play.

Crystal Dynamics

Orion Off-Road Extreme

Sega Saturn Action

Crystal Dynamics is currently in the process of translating a number of their hotter 3DO titles to the Sega Saturn.

Orion Off-Road Extreme is an updated version of a futuristic racer. You must hunt down criminals in your buggy and smash them with your blazing cannons.

As the game progresses, you have the opportunity to acquire more weapons and armor. The levels vary from jungles to hellacious volcanoes.

If you liked Off-Road Interceptor for the 3DO, this souped-up Sega Saturn version is just right for you.

Maneuver through narrow canyons while shooting the criminal buggies.

The look of this game is similar to Total Eclipse with its texture maps.

Some of the levels feature unique pitfalls to stop you in your tracks.

Legend characters are drawn similar to those of DerkStalkare and X-Men.

There are 11 fighters to choose from, plus possible hidden warriors.

Guy takes on Strdy in a one-on-one match. Each fighter has his own strengths.

Capcom
Street Fighter Legends
 PlayStat./Sat. Fighting

Here is the fighter to end all fighters. Capcom brings players to a time before the World Warrior fights, introducing a younger Ryu and Ken, not to mention some new fighters. Warriors like Birdy have been resurrected from the original Street Fighter, while Sodom and Guy have arrived from Metro City to fight.

Street Fighter Legends uses an updated engine similar to many of Capcom's fighting games. Legends allows you to charge up a power meter for extra-special attacks, and there may be a few hidden fighters inside as well.

A close translation to the coin-op, this CD should be a real treat for fans of the series.

RPG

The long-awaited sequel to *Breath of Fire* is here, and this time Capcom is bringing it out themselves. Join a party of adventurers as they try to stop the Dark Dragons from destroying the world.

Breath of Fire 2 has some cool new features, like a town-building scenario and a way to combine character attacks. Add in new-and-improved graphics and you have the makings for an epic saga.

Breath of Fire 2 promises players days of adventure. Can you survive in the world of magic and intrigue?

Travel the world searching for allies in your struggles.

The spells you can cast are better looking than ever before.

Breath of Fire should be released around November if things go right.

Gex

Sega Saturn

Action

You've seen him on the 3DO, and now he's on his way to the Sega Saturn. It's Gex, Crystal Dynamics' famed gecko. He's off on an improved transition for the new Sega machine.

Fight the forces of the evil Reiz by traversing themed worlds like the Cartoon Zone and the Horror World. Gex is loaded from head to tail with humorous one-liners that'll make you burst out laughing.

The graphics of the Sega Saturn version are improved, and Crystal may have put in more secrets for the treasure hunters out there. Score one for the gecko!

In the Adventure world, Gex must battle savages and horrible traps.

In Reiz's domain, one wrong move may be your last. What a challenge.

It's *Samurai Sunday* in the Orient—lots of samurai and other surprises.

Crystal Dynamics

The Horde

Sega Saturn

Strategy

When Crystal Dynamics released this innovative strategy game for the 3DO, players were instantly hooked. Now, Sega Saturn owners can see what all the ruckus was about.

Hungry critters called Hoardings attack the realm every few seasons. It's up to you to tortoise the ever-growing towns, and battle the buggers when they finally arrive.

Kirk Cameron makes a comeback appearance for the full-motion video sequences that build the story.

The Horde is a great strategy game. Try it out.

See humorous cleaves, like the ill-fated *Adopt a Hoarding* program.

As you raise money, you will be able to buy more advanced weaponry.

Protect your cows at all costs. They are the key to success.

Shanghai Triple Threat

Sega Saturn Puzzle

Play a modern twist on an ancient game. In Shanghai Triple Threat, you must remove two matching tiles at a time until all the pieces are gone. It sounds simple, but it will take concentration and a strong mind to conquer a puzzle. To make matters worse, there are special pieces that must be matched according to theme.

Just so your eyes don't bug out, you can change the tile patterns to suit your tastes.

Shanghai Triple Threat is an addictive puzzle that will draw you right in.

The Avalanche Mode has pieces that are affected by gravity.

A Two-Player Competitive Mode can set your Sega Saturn on fire.

Shanghai Triple Threat adds some new twists on an old game.

Return to Zork

Sega Saturn RPG

The epic adventure of Zork continues with this latest installment. (I remember playing the first four on the Commodore 64!) Enter the world of Zork where nothing is as it seems. Puzzles and riddles test you at every turn.

True to the series, Return to Zork is loaded with tongue-in-cheek humor and longtime fans will get to return to older locations.

Set 700 years in the future, you must save the realm from Morphous, the evil ruler of the Great Underground.

Zork is the ultimate point-and-click adventure.

Return to Zork adds full-motion video to the series, bringing it to life.

Explore the Great UnderWorld. Things have changed since you've been here.

What secrets will you find in the Valley of the Vultures?

Incredible Toons

Sat./PlayStat. Puzzle

A strange form of the computer game Incredible Machine, this CD has been given Capcom's touch. The object is to solve puzzles using Rube Goldberg-style devices.

Capcom's classic characters from Ghouls 'N Ghosts help set this title apart from the computer version.

There are 100 precreated puzzle rooms that will test your mettle. Can you build what you need from the assorted bits and pieces of junk? Incredible Toons will challenge beginners and puzzle buffs alike with its multiple settings.

This addictive game has been renamed the Incredible Toons.

Assemble rooms, bridges and other contraptions to win the puzzle.

Capcom has given Incredible Toons a creepy twist with cool animations.

Death Keep

3DO

Adventure

In the tradition of *Slayer* (S.S.I.'s previous D&D 3DO game), you are a lone warrior embarking on a perilous quest through dark, dismal dungeons.

Death Keep improves on the older game by allowing you to select one of three warriors. The graphics are smoother, too.

This CD is primarily a first-person *Doom*-type game. When monsters appear, you must defeat them using spells or darts.

Death Keep is a cool adventure that should keep *Dungeons & Dragons* fans spelunking into the depths for a long time.

Disgusting creature roams the hallways looking for lunch.

You can look up or down. You can even fire through windows!

Captain Quazar

3DO

Action

Captain Quazar is a hot new action title developed exclusively for the 3DO by the hotshots at Studio 3DO. This could be the character that will be to the 3DO what *Sonic* and *Mario* were to the Genesis and Super NES.

Captain Quazar is a cosmic cop who must stop a dastardly crime syndicate from gaining control over the galaxy.

This CD will take the 3DO to new heights. There hasn't been a great action game on the system since *Gex*, so this title should breathe more life into your system.

Things are viewed from a 3/4 perspective, giving you a panoramic shot of the the action. The graphics are colorful and cartoon-like.

Captain Quazar looks to be a top-notch action game. It's loaded with all sorts of wacky power-ups. The Cap will need all the help he can get. Hopefully we'll be getting more on this cool CD. *Captain Quazar* is the hero of the future.

Captain Quazar is an intense action game that will heat up your 3DO.

Action

The action-packed summer blockbuster movie is on the Genesis. Batman Forever takes the Caped Crusader on a digitized adventure.

Batman Forever can be a one- or two-player game. One person gets to be Batman, and the other is target...er, Robin.

The whole game is filled with digitized characters, so it resembles the ill-fated Steven Seagal game from about a year back.

Batman Forever is Acclaim's latest foray into the comic scene. What's next?

Choose your arsenal carefully, so you'll be prepared.

Blade Force

3DO

Action

Blade Force is the latest project from Studio 3DO. You are a helicopter pilot in the far future. In a world without law, you must take justice into your own hands.

This CD puts you in control of a chopper. You are able to fly around in a realistic 3-D environment. There are enemies to shoot and icons to collect. Each level gives you an objective. One example is where you must track down a crime boss and eliminate him. Sounds like fun, doesn't it?

Blade Force is one of the most visually impressive 3DO games around. You should try it out.

Shoot this key icon to reveal the mission object, then enter it.

Blade Force allows you to move around in a 3-D environment.

This CD should be a pleasant surprise for the 3DO players out there.

Capcom

Final Fight 3

Super NES

Action

Metro City is in trouble again. A sinister force is wreaking havoc around the town. It's up to you to beat up those who are responsible.

Final Fight 3 is a continuation of the popular series. There are four fighters you can choose, including Guy and Haggar. There is also a new female fighter and a strange warrior who looks like he has blades on his hands.

FF3 allows for two-player simultaneous play, plus if you are alone, you can choose a computer-controlled sidekick.

This is just what you need to relieve stress!

There is a great total of four fighters you can play as.

There are all-new moves to fight, as well as new techniques to learn.

Final Fight 3 picks up where the others left off—more Metro City fun.

Primal Rage

Sega Saturn | Fighting

Primal Rage for the Sega Saturn is close to being released. As to be expected, this 32-bit rendition is as close as you can get to the arcade.

Like the other Primal Rages (there are two others in this Next Wave section alone), players get to control vicious prehistoric beasts in one-on-one combat. The winner gets to conquer the new Earth. Each beast has an array of moves. Aggressive players will seek out combos.

Add in finishing moves, and Primal Rage looks like it will be a hot game for the Sega Saturn.

This version features large beasts. Bigger than the 300 east.

Some attacks are pretty gross. Like Chass' bitch for example.

Titan has a nasty three-hit combo that is really easy to pull off.

In Primal Rage giant creatures roam the world after a terrible accident. They battle it out in brutal bouts to the death.

All of the characters are fully digitized and animated smoothly. This title seems to be making the rounds on nearly every system.

The PlayStation version of Primal Rage is a very close translation.

In the 16-Bit versions, you save the atolls from a group of pirates called the Smokers. This is primarily a shooter-type sequence. You have to blast the enemy jet skis and boats with your spear guns. There are also side-scrolling action sequences that have you fighting it out with the scum of the Earth.

The Virtual Boy Waterworld promises to be a 3-D arcade simulation. It is loaded with lots of shoot-'em-up action. The system will immerse you right into the middle of the action.

Waterworld for the Sega Saturn is early, little is known except that its graphics will be spectacular.

Domark has a cool new flight simulator for the 3DO platform. In Flying Nightmares, you control a swift weapon of death.

Choose from a number of missions ranging from air-to-air combat to ground targets. Flying Nightmares is a complex flight simulation. It'll really put you in the cockpit.

Using the powers of the 3DO, Domark has given this CD a feel as realistic as possible. One look at the pics below, and you'll see how any flight sim fan could flip out. Are you ready for war?

Cool climates get you into the mood. Do you want a harrowing daylight?

There are multiple missions that you can test your skills with.

Sega Light Crusader

Genesis Action/RPG

Sega has whipped up a great new game for their action/RPG lineup. The game is called Light Crusader, and I think you'll find it as cool as I do.

Set in a fantasy world with swords and sorcery, you are a knight who has decided to take a vacation. However, duty calls and soon you become embroiled in a giant quest.

The whole game is rendered from a diagonal view similar to Shadowrun. It combines action elements in a Zelda-esque fashion. This is one of the best Sega games around.

The King gives you your first mission: Find the missing citizens.

The visions of Light Crusader are cool, but they mess up your bearings.

Buy weapons, potions and armor at the shops you will come across.

Koel P.T.O. II

Super NES Strategy

Take a trip back in time to the end of the World War II. Pacific Theatre of Operations II puts you in control of either the Japanese or American Navy in what was some of the most vicious combat of the war.

P.T.O. II has a format similar to the other Koel strategy games, although this one seems a bit more complicated.

The graphics are simplistic, but there are so many options, you'll feel like you really are in command. This game is your chance to try your hand at abhorring history. Can you affect its outcome?

There are a great number of scenarios to try to conquer.

This is the Main Scenario of the game. You make the decisions here.

P.T.O. II continues Koel's impressive lineup of reality-based simulations.

Build it. And they will come. Then you can **KILL** them.

Do you want to play against the pros? Or be one?—4 have had their real swings digitized into the game. Strengths and weaknesses. Although don't count on too many weaknesses. They are, after all, PGA TOUR pros.

When you play the PGA TOUR you've got to play the championship courses. The real ones. With even more courses available to add to your tournament repertoire. Don't forget, you're playing from the blue tees.

Since there's no caddy, "Picture in Motion" lets you see both the pros, watch your shot from the hole's viewpoint, and review every hole from multiple perspectives. And you don't have to give it a percentage of your earnings.

Funny what happens to an 18-inch putt
when it's for a PGA TOUR championship.

Your choice. Tournament play? Match? Stroke? Shootout? Or maybe Skills? There are even more pros to compete against, no matter what you play. But first ask yourself, are you really ready to take on the PGA TOUR?

FORMER BEARS COACH TAKES TO THE FIELD FOR DIGITAL PICTURES

I really enjoyed coaching, and if you're asking if I would like to take back some of the things that happened on the field, my answer is sure I would, but I can't. Every time I had to talk to a player, the camera was on me when it was a heated situation. They didn't show viewers when I congratulated my players for what they did.

—Mike Ditka

It took two weeks to shoot all of the video for Digital Pictures' new full-motion video game for the PC, 3DO and the Sega Saturn. As the QB, you run the offense and try to avoid the wrath of Ditka.

The smell of pigskin is in the air as companies with their football titles head out of training camp to vie for this year's Super Bowl of gaming. Digital Pictures has enlisted the services of "Iron" Mike Ditka in their full-motion video title, which has him back in the coaching saddle.

Sony is hoping to deliver some competition of its own with NFL Game Day. This game looks and plays great.

However, EA Sports and Madden '96 for the PlayStation are ready to take on all comers.

If you aren't interested in

forking over the coin for a PlayStation or a Sega Saturn, we haven't abandoned the 16-Bit sports games like other mags have. Take a look at some other football contenders: Emmitt Smith lends his name to JVC's gridiron title, while Sega teams up with Deion Sanders for their Prime Time NFL '96 game.

From Tecmo comes the third installment of its Super Bowl series.

Rounding out the pack is a college title from Electronic Arts that features the nation's top teams.

We have the arena play-

by-play for you this month. We'll let you know who matches up against who and what games to watch for.

Besides doing a football game, Sony Computer Entertainment is also working on a baseball game and two basketball games.

That's right, they have two separate teams vying for the right to bring out the basketball title for the PlayStation.

We have another action-packed sports section for you this month. It's time to lace up the skates and go out and get some...but remember to keep your head up!

Center Ring Boxing

Remember playing 4-D Boxing from Electronic Arts for the PC? Well if you do, you'll recognize the perspectives and game play that this boxing game has to offer. The engine from the PC version is implemented to this Sega Saturn title, but detailed with

state-of-the-art graphics and animation.

This boxing bonanza is still in early development, but seeing what this game has proven in a early stage

promises great game play with bone-crushin' excitement. As you can see, all of the characters are rendered

as is the ring, and replaying your fight from different angles is quite amazing. But one gripe that I have is that in some angles when you are fighting it's very hard to distance yourself from your opponent. This needs some improvement. Hint: Maybe the JVC programmers can implement the distance feature from the PC version where you can tell when you're close enough to throw that bomb at your opponent.

Have you ever seen a female boxer in a video game? Women are everywhere. If you try the Tournament Mode you can fight the women of the ring, and hey, they're tough! You can even start as a female when creating your character. This game has it all!

I'm amazed with this early version by the looks and easy controls of the boxing movements, but there's still a margin for improvement

The men should've been called "Magne" Mike Ditka, not "Iron" Mike.

If his tenure as Chicago Bears' coach proves anything, it's that Ditka knows how to attract attention.

He did it in 1985, when he described Washington Redskin Dexter Manley as having the "IQ of a grapefruit." He did it several years later after a loss to the San Francisco '49ers, when he threw his gum at a mocking fan. He did it with sideline fare-ups with quarterbacks and caustic comments to a quote-hungry press...the list goes on and on.

For 11 seasons, Hurricane Ditka whipped up a torrent of controversy and drama that rivaled the most seamy of soap operas.

However, when the Bears began to slide in the early 1990s, it was Ditka caught in the storm. Despite growing criticism over Ditka's tough style of coaching, the football world still felt shockwaves when the Bears let him go in January 1993.

In a bizarre sense, Ditka's

accomplishments seem almost a sidenote; a stellar playing career as a tight end, an overall coaching record of 122-68, coaching the Bears to a 46-10 win over the

Ditka offers his take on the state of the NFL and his future plans.

Team EGM: Will you ever coach in the NFL again?

"I wish I didn't fly off the handle as quickly as I did sometimes, but yet...you gotta be who you are."

Patriots in Super Bowl XX, induction into the Pro Football Hall of Fame.

It's Ditka's personality—his gumption—that everyone remembers. He's down to earth. He tells it like it is, whether you like it or not. Unlike other sports celebrities, Ditka's image is not a carefully refined PR firm's creation; if all comes from an honest, fiery man. That trait has won him the admiration of many; most notable are the Saturday Night Live "Superfans," resident worshippers of "De Coach."

Now an analyst for NBC sports, Ditka has turned down the heat a bit (much like an oven does when it cools from 400 degrees to 350). In his interview with Team EGM,

Ditka: I really don't know. I don't think so. I'll be honest with you; I think owners want a different kind of coach—I think they want a low-profile coach, and I'm not a low-profile coach.

What was your greatest moment in coaching?
No question: winning the Super Bowl. That's the ultimate goal of every coach—it should be the ultimate goal of every coach. It's taking an organization—in my case the Chicago Bears—that had been a foundering organization for 20 years, and we took them and we turned that organization around. That was the greatest thrill of my life because it was something not that I did, but we did as a team to collectively reach our goal.

TECMO SUPER BOWL III: FINAL EDITION

ON SALE OCTOBER '95

FINAL EDITION

Question: Did the 49ers win the Super Bowl because they were the best looking team in the NFL? Of course not! They won because they played the best. Similarly, it is not enough for a video football game to appeal to just the eyes. While most football "games" offer just "eye candy", ONLY Tecmo gives you the great looks and the awesome game play needed to capture the total NFL experience.

BETTER FEATURES

Along with offering all 30 NFL teams with 1995/96 rosters, Tecmo Super Bowl III - Final Edition brings you the ULTIMATE option: Custom Player Creation. Select name, number, position, team, and customize individual abilities for up to 37 players. Have your custom player play well during the season and you can develop/improve his skills further as you head into the playoffs. Only Tecmo gives you the chance to add YOUR name and player to the huddle with your favorite NFL players.

Other clutch options, for those who like to play G.M., are the Trade Mode that allows

- Final Edition offers the best in NFL game play value. Also, gamers get the best in game replay value. As you know, Tecmo Super Bowl III - Final Edition is a 1 or 2 player simultaneous game. However, Tournament Style play can let 1 to 30 different players get in on the action. Gather 1 to 30 players together and have each

pick a team to man throughout the 1995/96 season. Now, we add grand it out to see who is good enough to make it to the playoffs. Outman the elimination rounds of the playoffs, and have your two best battles for football supremacy in the Super Bowl. The Battery Backup will allow you to take time out, but

with each of you creating custom players and making FA and/or trade deals, you may not take one. Perhaps best of all is that, unlike the real NFL season, you will be enjoying NFL football with Tecmo well past next January.

BETTER HURRY

These other "spectator" sport football games just aren't going to make the final cut! So don't be just a "spectator", bring home the REAL DEAL, bring home Tecmo Super Bowl III - Final Edition and find out what it's really like to PLAY it! Be sure you reserve your copy by October 3rd, 1995 or you may not make THE FINAL CUT.

you to pull the trigger on a blockbuster deal, and the all new Free Agency (FA) Mode. The FA Mode allows you to release/acquire free agents from all of the NFL teams before the season kicks off. You can be conservative and go for backups, or clean some loose and go after the best Runningback to put your team in "Prime Time". As up to you.

BETTER PLAY AND REPLAY

Tecmo Super Bowl III - Final Edition not only gives you the players and action you want, it gives it to you the way you want it. The game play is a "snap" to get into and does not require any previous football experience (unlike some other football video "games").

The Tecmo horizontal scrolling perspective allows players to easily follow, understand, and play the NFL experience. After all, it is what you are used to seeing every NFL Sunday on TV. Tecmo even offers a Coaching Mode for those who just want to watch their play calling skills with the best of the NFL. By now it is clear that Tecmo Super Bowl III

Who are some of the best players you've seen in the game who've played for you or that you played now? Who do you like?

Well, the best player I've seen is (Walter) Payton. I've seen (Joe) Montana. Outstanding. (Dan) Marino. (Jerry) Rice—the best receiver who's ever played the game. There are a lot of 'em. I love Barry Sanders. I love Emmitt Smith. I like Troy Aikman.

How did you get the nickname "Iron" Mike?

I came out of a steel town in Pennsylvania, and that's basically where it came from. I'm sure that's all it was. I don't know. "Iron" Mike Tyson probably got it from having a hard head. Maybe that's why I got it, the same way (chuckle)

As a person with a seemingly quick temper as a coach, do you ever regret any of the incidents that took place on the sidelines?

Well, first of all you say "seemingly." You've gotta get to the point. Either I did or I didn't.

Well, seemingly, I mean... Well, let me ask you: How quick was that temper in 1985 when we won the championship?

It wasn't there. But it was. You see, nothing has changed, nothing ever changed since the first day I coached. It's how the media perceived it.

That's why I said "seemingly," because every time they showed a picture of you during a football game, it seemed that they'd key on you when...

But they'd have the camera on you the whole game so

they can pick any one play they wanted to. But you're right. I do have a temper. There's no question about it. I don't regret a lot of them, but there are a few. Some of the guys I've gotten into shouting matches with rightfully deserved it, because they were wrong—period. They were wrong not for the sake of being wrong against

How did you get into coaching?

I was a player with the Cowboys my last four years, and when I retired from football, I was hired by Coach Tom Landry to coach the receivers of the Dallas Cowboys.

What advice would you give to the kids today to

healthy, then I think he can accomplish what he wants if he's willing to pay the price.

The popularity of the NFL skyrocketed in recent years. What do you feel are a few of the contributing factors in why the league has grown so much?

Well, I think it's an exciting game. I think the excitement of the game is the main thing. I think it's very competitive and getting more competitive. No one team dominates anymore.

But I still feel that it's competitive, it's a tough, physical football game. I think people relate to that. I think there's enough strategy involved in the game that people can relate to that too.

What do you want fans to remember about you either as a player or as a coach?

That I always gave my best, that's all. People didn't have to agree with it (what I did), they didn't have to like it—maybe they did.

But I gave my best. On the field as a player I did, and on the field as a coach I did. I never asked a player to do more on the field as I did when I was a player, work any harder or expected any more from them.

But I did expect them to play as hard as they could. They can make mistakes in the mental framework, but not because they were lazy. That's all that I ever asked. So that's what I want... that I was fair.

I know it's kind of early, but who do you think will be playing in the Super Bowl? The '49ers seem to have the upper hand and it seems they'll continue to have the upper hand, maybe this year again. (But) I already picked it this morning: San Francisco and New England.

me, but they were wrong against the organization. I wish I didn't fly off the handle as quickly as I did sometimes, but yet—you know—you gotta be who you are. Don't forget, in the old days, when (Vince) Lombardi was coaching they didn't have a camera on him every play... who knows how often he got mad?

motivate them in reaching their goals?

Never believe there's something you can't do. That's the main thing. I think everybody puts a limitation on themselves. I think that's the worst thing individuals can do. There is no limit to what an individual can accomplish, especially if he's sane of mind and body. If he's

"Iron" Mike lends his name to Quarterback Attack with Mike Ditka.

The game uses full-motion video of hundreds of football plays, as well as shots of "Da Coach" praising your work or chewing your butt out.

Most of the action is shown from the quarterback's point of view. On the sidelines, Ditka will offer advice and encouragement. However, if you screw up, be prepared to face the wrath of Ditka.

A feature keeps track of your various passing stats and calculates your QB rating, so you can see how your skills stack up to other pro players.

In addition, a Two-player Option lets QB wanna-bes duel one other.

I guess I'm getting spoiled by all of the new 32-bit racing games. However, the control on this game is pretty good, and the motorcycle reacts much like a real one does as you twist and turn your way through the many tracks. There are four different play modes, and you had better head into the pits if you don't want a poor result. However, this game ran out of gas for me very quickly.

It's really sorry to say this didn't make it for me. The racing perspective was a bit dull, and there wasn't anything to it. Turning on those S-shaped turns or passing other riders is not realistic at all. Even when you crash into your opponent or at the trees that line the curves, the impact is so cheesy, it's missing some frames of animation. Two-player Mode is a nice touch, but that's all folks.

EA Sports is going to get some as they went under the hood and rebuilt the NHL Hockey engine. The players are 20 percent smaller and that translates into more wide-open game play. The defenses are tougher and goals are harder to come by, so you'll have to find new ways to score.

The AI of this game sees players cover for others that get caught out of position, and fighting is back this year.

I've been playing the last edition, and when I got a hold of this one, I couldn't seem to go back. The overall look of the arena and players are much cleaner. The players are smaller but the great game play kept my interest. Playing against the computer is tougher than ever. This is good, it gives the game some replay value. Against the 32-bit games this is still one of the best out there.

SATURN VIRTUA RACING (SEGA SATURN) BY TIME WARNER INT.

This game is a lot of fun. Virtua Racing is back and it is definitely new and improved. If you loved the 16-bit versions then you'll love this Sega Saturn version. More tracks and plenty of cool features will make you burn rubber long into the night trying to beat your previous time and take the checkered flag. But get ready to hit the brakes for kangaroos and keep your eyes peeled for koolha beers.

The arcade edition is a great game and playing this title brings me memories of the high-speed racing experience. But there is still something missing. Despite the intense racing perspectives, I feel the game could have been done better in the graphics department. I know what the Saturn can do, the game didn't use the full capabilities of this machine. Overall, this is a great game to have.

WHITE MEN CAN'T JUMP (JAGUAR) BY ATARI

I didn't find myself taking to the air too often with White Men Can't Jump. The half-court perspective isn't impressive at all. Some of the trash talk from the announcer is cool after you take it to the hoop, make a three-pointer or are rejected. But the game is still too blocky looking and the control isn't where it should be. You can count me out of this b-ball action. I'm all hooped out!

Oh, boy. What am I playing here? This game is not pleasing to see or hear. The whole perspective of the game gets a bit confusing and hard to play with jerky player movements—especially when it's not well animated. It's really hard to see what you're doing and I'm getting tired of the all-out gonle ball. I rather stick to real NBA-style b-ball. This game didn't cut it at all, didn't have any air in it.

QUAKE!

FIRST TREMORS FELT WORLDWIDE!

One of the most anticipated releases in the new masterpiece from id Software, *Quake*. Following the success of *Doom 2*, it is easy to see why this game is causing such a buzz.

When a company gets ready to release a title as big as this one, it's nearly impossible to keep it quiet from the public. It's especially hard when people have access to a mass communication tool like the Internet, but up until now, hardly any real information has been released.

Now if you're looking for info about *Quake*, outside of id's site, just grab your board and start surfing to any other game-related site, and you should have no problem. The only problem you might encounter is finding out

some of the levels from the game. If there's one sure-fire way to get people excited about something, it is to keep things a secret. That's what id is doing.

As far as any statistics, id is not ready to comment yet. Until the game hits the shelves, all we can do is cross our fingers and hope that *Quake* will be well worth the wait. Until then, enjoy the sneak preview.

A PEEK AT THE FUTURE...

With only a couple of months left until the end of the year, all the software companies are putting the finishing touches on their products and getting them ready for the holiday season. After a little research, I was able to take a look at the lineup of games that are coming out and was very impressed to say the least.

There are a lot of great new titles, but I was surprised to see how many sequels are currently in the works. Looking back on some of the more popular games that have been released, you will find that many are sequels. *Mach Warrrior 2*, *Jauneymann Project 2* and *11th Hour* just to name a few. An sequel has a risk to compare them to creating an entirely new concept for a game?

As a consumer myself, I would be more comfortable buying a game I'm familiar with, I'm picking up a title with no track record. However, the original *Space Quest* had no track record either...does that make it a bad game? I guess it all comes down to your preference as a consumer.

If you're into some of the new titles, it would be a good idea to get a little info before going shopping. But if you love sequels, prepare yourself for some great ones in the future. How about *Magic Carpet 2*, *Robot Assault 2*, and *Flash to Back*, the sequel to *Flashback* just to name a few!

TIME FOR A MAGIC SHOW

Magic the card game has sold over 500 million copies so far. With a record like that, it's no wonder that this highly addictive fantasy game will be making its way over to the PC.

MicroProse, in conjunction with *Wizards of the Coast*, will be bringing the collectible card game out on CD-ROM with a few added extras. Some of the key features include the ability to play the game alone or against other players across the world with a modem, an artificial intelligence that keeps track of all the rules while you are competing and an online chat feature that will allow you to interact with your opponent during game play.

Did I say interested with your opponent? What I really mean is that your cat taunt the enemy just when you're about to pull out your *Seven Dragon* and wreak some serious havoc!

The game will include cards from the basic set and also each expansion set!

MAGIC CARPET 2

There are many great games on the market, but only a few of them can be labeled truly innovative and groundbreaking. Magic Carpet happens to be just one of those games.

Its sequel, MC2: The Netherworlds is very similar to its predecessor, but includes some very impressive features. The flight engine has been improved to run over 70 percent faster, plus there are now underground and night levels to test your skill and an eight-player network support. **Availability:** fall 1995

FLIGHT OF THE AMAZON QUEEN

This graphic adventure will take you on a humorous and challenging trip back to the Amazon.

Play as Joe King, pilot-for-hire and travel to more than 100 different locations solving increasingly difficult puzzles.

With more than four hours of game play and an average price of about \$20, Flight of the Amazon Queen will keep any adventure enthusiast happy. **Availability:** Sept. 20, 1995

CAESAR 2

In Caesar 2, your goal is not only to successfully build a Roman province, but also protect it from any male by either a good structural defense (such as walls and towers) or by raising up your armies to battle with the enemy.

This sequel to its award-winning predecessor has the same structure, but many enhancements were made to improve the game play. The interface has been entirely redone, and a query function has been added. This will enable the player to "right click" on any structure and check out all the info on it similar to SimCity 2000. **Availability:** September 1995

FADE TO BLACK

This captivating sequel blends arcade adventure with strategic game play to create an entirely 3-D world. If you're familiar with Flashback, the story is pretty much the same. You're surrounded by aliens who are outnumbered and fighting for your life! The game offers six levels, each with its own sub-levels and missions.

Availability: September 1995

SILENT STEEL

This interactive strategy adventure is a full-motion video title that will put you in control of a nuclear attack sub. As captain, you will need to make critical decisions in order to progress through the intricate plot that has over 30 different endings.

The game was filmed on a real Naval submarine with professional actors. It features over 300 minutes of full-motion video on three CDs.

Availability: fall 1995

BATTLE BEAST

This unique fighting game may look like a "kicker" title at first glance, but it has some very impressive credentials. There are more than 100 secret moves, weapons and hidden power-up items.

Each of the six characters has the ability to morph into a Battle Beast, and there is an artificial intelligence that learns your favorite moves and is smarter each time. **Availability:** August 1995

HI-OCTANE

WHEN YOU'RE TRAVELING AT SPEEDS IN EXCESS OF 100 MPH, DON'T EVEN BOTHER LOOKING FOR THE BRAKES!

HI-OCTANE IS NOT YOUR AVERAGE RACING GAME!

If I look at the many games I've ever played and rated them 1-10, they would all get a 5. The main reason is because no matter how great the game may look, without a lot of action, zipping around the same track for 10 laps can get pretty boring. If a game is going to succeed, it'll have to keep the player's interest for more than a couple of hours!

Hi-Octane definitely stands above the rest, because it has every feature that a gamer could ever ask for. First,

there are six different hovercrafts to pick from, each with its own special characteristics, including speed, armor, weight and firepower.

As far as weapons go, each craft is equipped with a chain gun and a missile launcher. Both are very effective against your opponent, and can be recharged and upgraded to certain points in the race.

In other games, the computer drones are either easy to beat (meaning you spend the entire race leaping over drivers) or the opposite (the computer cheats too much).

Hi-Octane does away with this

problem. If you're at the end of the pack, you may not be able to pass the leaders. But with enough firepower, you can muscle your way to the front by process of elimination.

However, if you're skilled enough to be holding first place, when you start to lap the computer drones, they will launch everything they've got to take you out.

The last feature available to you on your craft is the booster. Besides being a very effective way to pass other drivers, you'll need it every time you see a big skull-and-crossbones sign. This is a good indication that there is a ramp coming up, and charging your boosters may be the only way across the gorge!

In the first course, you can see on the map where the shortcut is but you'll need to slow down to find it.

If you have enough time, take a pit stop to fill up on some items you may need. How about ammo?

Course four is the most dangerous. Keep an eye on your map at the bottom. Time it so you won't suffer from a mid-air collision.

TRACK INFORMATION

There are only six tracks you can pick from when racing, but each one has its own little secrets. Figuring them out will not be an easy job.

First, there are little pit stops in different areas of

the track where you will need to stop and recharge your weapons, shields and most important of all, fuel. The tracks themselves are very intricate, sometimes confusing. But with a bit of racing under your belt, you

will notice that there are shortcuts and secret areas to find.

The shortcuts are great for making up some time, and the secret areas have tons of power-ups to use to your advantage (if you're lucky enough to find them).

There are four different camera views you can pick from: three trailing views, so you can see your hovercraft and a cockpit view. I'm partial to the cockpit view myself, because you can tell how bad you're getting hit by the chain gun by the amount of bullet holes in the windshield.

One of the most important features is the ability to have eight players racing at the same time over a network. There is even a league table where you will be able to keep track of your progress.

If all the features that Hi-Octane has to offer aren't enough, the graphics on

this high-speed racer look great.

One great touch is the way the road seems to be blanketed by a layer of fog. This drastically cuts down on visibility of the corners, and makes it hard to see shortcuts.

The bottom line is this game has enough features to keep the die-hard racer busy, but can also be enjoyed by somebody who would rather just strap themselves in and play

Not being a very big fan of racing games, I really had no idea what to expect. After playing one race, I was having so much fun I didn't want to put the joystick down.

There are many games nowadays that rely on a lot of the technical aspects (like using 16 different keys to control a flight sim), that it gets to be more work than fun. I enjoyed the game.

My only gripe was that there could have been more than six tracks and some different weapons.

—Mark LaFolbre

One good feature about the race is that nobody's perfect. If your shields are depleted, the computer drone will recharge all your meters and set you back on the track.

THE COMBAT HELICOPTER SIMULATION

With all the flight simulators on the market, it's a challenge for a consumer to figure out which is the best game to buy. One of the major problems when purchasing this genre is the perfect medium between realism and fun.

If you pick up a sim that has all the aspects of real aircraft first, the game will be too tedious. You will probably need to read quite a bit of the manual before you can get your "bird" off the ground. If it's realism you're looking for, then you've purchased the perfect product.

But if the game is lacking realism, it will probably be a simple flight engine that won't require too much reading or training to actually get behind the seat. This is great for the average player, but simulations aren't for getting your feet wet. They're for experiencing flight at its highest realism level.

I believe most of the helicopter sims out are focused on the combat aspect. They aren't really true sims, when it comes to the actual flight characteristics of a helicopter.

Interactive Magic has come up with the best of both worlds: Apache. For inexperienced players, boot the game up and fly in a matter of seconds without reading the manual. There are several different modes that anyone can play in.

The Inevitability Mode is pretty self-explanatory: It allows the player to jump into the game worry free. The Arcade Mode is a bit more difficult, because you can be shot down at any time.

The highest level of flight is the Realism Mode. This mode can be challenging and frustrating at first because to change air speed, you must use a certain amount of pitch by tilting the nose of the helicopter up or down to gain

forward momentum while at the same time constantly monitoring your altitude. This is exactly how a real helicopter is flown. It will take a while to get used to.

The difference that makes the Apache and Realism is that unlike the Realistic Mode, in Apache, the joystick affects the forward momentum without affecting altitude. This means that you will give-up a lot of realism, but will have lower crash and burn.

Apache is one of the few titles that can offer any player the ability to plug and play. It also increases the challenge of the game in many different ways:

The cockpit and your HUD are your most important tools of reference. Here you can check the distance then lock on to your target.

BRUTAL.

You're Dead Meat!

Standing naked on a glacier, munching on tribesmen, something really bad is coming. Suddenly, a claw-happy rapier comes screaming out of nowhere to slice and dice you into gorilla cold cuts. Before he can rip your face off, you nail the lizard breath with a crushing brain bash. Just another day.

It's Primal Rage.

With all the flesh-ripping fighting moves, action and fatalities that made the arcade hit #1. It's new. It's different. It has Flying Butt Slams and Farts of Fury. Deadly multiple combos to pound your opponents into submission. Unbelievably realistic character animations. And of course, Power Pukes, Gut Gougers, and Face Rippers.

Primal Rage. For Sega® Genesis®, Super NES®, Game Gear™ GameBoy®, and PC CD-ROM.

Urth Shaking Carnage!

The simulation is based on the AH-64 Apache Longbow, and features some of the best-looking 3-D effects I've seen in a sim. As far as combat goes, no expense was spared; it offers three real-world geographic areas in Central Europe, the Gulf and East Asia, encompassing an area of over 2 million square miles.

Before heading out to save the world, it's a good idea to check out the training missions in the game. In preparation for a full campaign, learn basic skills of flying at Fort Hood, like weapons training, precision landing and formation flying.

When you feel confident enough to take over a small country, choose to start one of the campaigns. There are over 60 play levels to challenge even the most sophisticated pilots. I've played many sims, and nothing ever impressed me as much as Apache.

The game has a really neat feature that allows two people to play at the same time. One player takes on the role as the pilot, and the second player has all the duties of a gunner.

If Two-player Mode isn't enough, the game will allow up to 16 players to battle each other via a network.

Not only is the flight engine down to the very last detail, so is every aspect of the game. The weapons system is identical to the real thing, including a full integrated helmet and display sight system. The majority of all the information you need throughout a mission will be conveyed to you through your instruments and gauges located on one of the two cockpits available, the pilot and the co-pilot/gunner.

Lastly, a lot of folk say graphics suffer when pixels are enlarged close to the screen. What this means is that if you're 4,000 feet up in the air, the terrain will look picture perfect. Now see what happens when you're 75 feet in the air or an enemy flies right in front of you at a high rate of speed. The image gets blurry and pixelated, taking away from some of the realism. In Apache, a new low altitude 3-D terrain technology was used to solve this problem. The end result is a game that offers not only true realistic flight, but also the high-end graphics to back it up.

"Apache is as close to flying the actual aircraft as any simulation I have ever seen."

"I found the attention to detail, sound and flight characteristics to be nearly identical to that of the actual aircraft."

I have always been really interested in flight simulators, but I was never really impressed enough to spend the time that a game of this genre deserves. I have to admit, I really took a liking to Apache right from the first mission. There are a lot of games that try to brag about what new technology was used to develop (the game and how good it is). Apache will sell itself on pure game play, realism and enjoyment. A great game overall.

THE STREETS OF EDGE CITY

The Streets of Edge City is a very dangerous place. Dorian's thugs are all around. Make it through the construction and beat up those thugs if you want to make it to the bank.

There is a lot of money lying around, so pick up as much as you can.

This torch-carrying body can also jump with the best of them.

EDGE CITY BANK

Here at the Bank you can withdraw a lot of money, but you have interrupted Dorian's bank job. To get the money, you will have to fight through his thugs.

URBAN STRIKE

WITH THE NATION UNDER THE
THREAT OF TERRORIST ASSAULT, YOU
HAVE BEEN CALLED UPON TO WIPE
OUT THE SCUM...

PLAYER'S NOTES:

FIRST IMPRESSION

Excellent! I've been waiting for this game for a while. After playing both Desert and Jungle Strike, I was looking forward to Urban Strike. Unfortunately, when I started it, I became disappointed quickly.

BEST FEATURE

I would say that the best feature is the fact that you don't always stay in your chopper. Now to complete some of the missions you must take the fight to the enemy face to face on the ground.

WHAT'S MISSING

Graphics, sound, playability—just about everything that made the first two fun. The graphics haven't improved. They don't flow well. The sound is very exciting, but the helicopters seem a lot harder to control.

WILL YOU LIKE IT?

If you were a big fan of the Strike series, then you will want to pick this one up just to say you have all of them. Otherwise, I would be loath of it. Hopefully they will work out some of the bugs.

—David Rochalski

ICONS

The Ammo Crates will give you a full supply of ammo.

The Armor Repair will fix the damage done to you.

The Fuel Drums will give you a full load of fuel.

YOUR CHOPPERS

Arm yourself with the Militia's finest

MOHICAN

The Mohican is the army's finest attack helicopter. It is very fast and maneuverable. Plus it carries a lot of weapons.

BLACKHAWK

The Blackhawk is the army's finest rescue chopper. It can carry up to 20 people to safety, thus reducing mission time.

NOW YOU CAN TRAVEL OUTSIDE OF YOUR CHOPPER

Unlike the other Strike games, Urban Strike allows you to take the battle to a whole different front. Now to complete some missions you must leave the relative safety of your helicopter and battle on foot. You will be armed with your trusty M16 and a pack of nine Hydra missiles.

MISSION 1

HAWAII

Mission One is a good intro for those who have never played any of the Strike series. You will get to use both the Attack and Rescue helicopters here. Watch out for snipers in the bush.

MISSION 3

MEXICO

On Mission Four trek deep into the heart of Mexico. Here you must destroy the weapons factory and the new weapon. Plus you must save the engineering crew that put it together.

Take out their headquarters to confuse them.

BAJA OIL RIGS

There's no time to rest, because Mission Two has a lot for you to do. First disable the two mini oil rigs, then save the passengers of a cruise ship. Kill their destroyer and save a Russian sub. Finally you must take on the Main Oil Rig in a fiery battle. Stay alert at the controls as the enemy has you in its sights.

RESCUE

ANNIHILATE

DESTROY

You must take out the oil rig defensive weapons.

MISSION 4

SAN FRANCISCO

Welcome to San Francisco, the City by the Bay. This particular city is under siege by terrorists. You must first protect the Bay and Golden Gate bridge. Take out the terrorists afterward.

Protect the bridges at all costs.

Watch out for armored vehicles under the fog.

PLAYER'S NOTES:

FIRST IMPRESSION

Boy am I confused! That was my first impression alright. The game seemed to confuse me right away, but as I continued to play, I became more accustomed to it and the controls and strategy became easier!

BEST FEATURE

The challenge offered by this game has to be the best thing one could expect from this game. It is tough when you get to the higher levels.

WHAT'S MISSING

The graphics and sound are a little on the weak side. The music becomes repetitive quickly also.

WILL YOU LIKE IT?

If you are into puzzlegames and the kind of games that challenge your mind, this game would be for you. If you are into the type of game where you can blow up an alien menace or rescue the princess, this game would not be the best choice for you.

—Scott Augustine

ZOOP

WHAT DO I DO?

The object of Zoop is to knock out a certain amount of building baddies. You have to match up the color of your pointer to the block you are trying to knock out. If you hit a block of another color, you will turn into that color. You can run into blocks of another color by choice in order to change into the color that you want to be. This is a useful tactic.

MANY LEVELS OF CHALLENGE!

Blast forward and knock out the color-coded rows.

ZOOP IT UP!

The more you knock out, the more points you can gain.

BLAKE'S HOTEL

You and the whole Scooby-Doo gang are staying in Uncle Blake's hotel when he disappears. Of course, it is up to you and your faithful buddy Scooby to find out who is responsible.

PLAYER'S NOTES:

FIRST IMPRESSION

The first thing that hit me when I turned this game on was that it is just like the cartoon. And just like the cartoon I couldn't stop watching or in this case, playing!

BEST FEATURE

The best feature of this game is without a doubt the mystery. All the clues are there to beat the game, but finding them and recognizing them is the trick.

WHAT'S MISSING

While I did find myself stumped from time to time, the game is not really all that long. Like all games in this genre, I was left wanting more.

WILL YOU LIKE IT?

I think that anyone who has ever heard of Scooby-Doo will love to take this game on. Anyone who would like to solve an intriguing mystery would also find this game instantly addictive.

PLAYER'S NOTES:

FIRST IMPRESSION

The thing that first caught my eye was all the cool animations that Pitfall Harry performs. This makes the game very amusing.

BEST FEATURE

This would definitely have to be the layout of the different levels. Each level is designed so that you cannot just run through it. Instead, you must find the correct path. And, you can also search for hidden areas.

WHAT'S MISSING

The worst part of the game is the control. It almost seems like there is a delay between your motion on the controller and what happens on the screen.

WILL YOU LIKE IT?

Yeah, I think you will like it. I found that the game provided a unique challenge missing from many of the games out today. It is good to play a game that has a little variety from the standard games that we have come to know—and love.

—Roe Marcinak

PITFALL

THE MAYAN ADVENTURE

BONUS ROOMS

If you find this during the game, it would be a wise idea to pick it up. It will take you to one of two levels.

In this bonus level, you have to pull the switches in the order they flash. Finish the game before the roof crushes you and a 1-Up awaits.

Look in the right place and you will be transported back to a place when 10 colors used to be cool and preets dominated the show.

THE MAYAN JUNGLE

This level is pretty straightforward. There are only a few areas where you can take a detour, so if you find yourself wanting to explore around, don't waste your time because the path will take you to most of the power-ups and treasure. However, you will want to search the jungle toward the end of the level because a 1-Up is hidden in the trees.

A few well-thrown stones will stop this beast in his tracks.

Check out this blast from the past. These pits used to wreak havoc in the original Pitfall, and they are just as much of a pain this time around.

STRONG SALES

After your initiation in the Mayan Jungle, you will find this level a bit more challenging. Unlike the previous level, you will find that the end of the level is a bit harder to find. I personally would look toward the top, but you may not want to rush right up there. After all, it is nice to find the power-ups, treasure, and 1-Ups hidden throughout the cliffs. Be careful because Ptitaf Harry can't swim very well.

Hang on tight Harry! Swinging across deep caverns can reveal new locales.

A few lashes of your whip will make quick work of these bats.

THE TAZARUOL MINES

Once you enter the mines, be prepared to get frustrated. You can see all the loons, but the problem is getting to them. All I can tell you is that they are all obtainable. The railcoers are very useful. You can push them to certain areas and then jump off of them to get to places that you couldn't reach before. I would suggest gathering all the treasure because you will need the continues later on.

WEAPONS

Whip

This is the weakest of the weapons because it lacks range.

However, you have unlimited use of it.

Sling Stones

These stones are effective against enemies who are far away.

These are easy to find so don't be afraid to use them.

Boomerangs

These should be used against the stronger enemies.

Make sure you catch it after the throw, or you'll lose it.

Exploding Stones

These will do damage to everything on the screen. Use them sparingly because they are hard to find.

SPACE PIRATE

Cobra was the most dangerous space pirate in the galaxy. Three years ago he dropped out of site and was presumed dead by most people. However, Cobra is a man of many faces and is now hiding out on Earth waiting for the right time to resurface.

The adventure begins when Cobra travels to a bar called Crazy Horse to meet Lady, his robot friend and partner. He arrives at the bar late as usual and there is no sign of Lady anywhere. He asks the bartender if he had seen Lady and orders a glass of milk, making him look like a wimp in the eyes of the patron at the bar. He wakes it very clear that he feels this way. You can ignore him of course, but you're Cobra the Space Pirate! Go ahead, pick a fight.

The gorilla at the bar wastes no time pelting his electro blade, and promising to dice you up real fine. Cobra now has a choice to either flee or fight. Hymn, I wonder? A well placed kick is enough to kill him with his own knife.

Now the two other patrons of the Crazy Horse are mad because you just gutted their buddy. Two on one is hardly fair so it's time to break out the heavy artillery. It's Psycho Gun time!

Just as Cobra prepares to kill the two scumbags, two flashes of light send them to their graves. When the smoke clears, he sees a beautiful woman standing in the doorway. In spite of her radiance, he does not fail to notice the gun in her hand nor does he fail to realize that she must have killed the two scumbags.

As he talks to her, you will learn that her name is Jane, a bountyhunter. She then decides that he better get out before she realizes who he really is and tries to cash in on the huge reward on his head.

Cobra leaves the bay and runs into this chubby weird bird dude. The bartender told Cobra that this thing might know the whereabouts of your friend Lady. After talking to it he determines that Lady is probably at the cemetery—the same cemetery incidentally that the infamous Cobra is buried in. That seems like too much of a coincidence so it's off to the graveyard to find Lady.

Of course, Jane is top good of a bountyhunter to be shaken that easily. You can bet your bottom dollar that you will see her again.

PLAYER'S NOTES:

FIRST IMPRESSION

As I read the story that scrolls by at the beginning of the game, I was completely ready to start the adventure. I was very interested to see where the story would take Cobra and what kind of trouble he would get into.

BEST FEATURE

The story with the cool anime feel of the game combine to make the best feature of this game.

WHAT'S MISSING

The lack of choices really hurt this game. It's not like playing an action game or an RPG exactly. It's more like watching an animated comic book that you get to interact with on a limited basis.

WILL YOU LIKE IT?

Fans of anime will probably like the graphics and the story. Action fans should be aware that this is not so much an action game but more of an animated adventure. Also anyone heavily into RPGs should be aware that the interface with this game is limited and that there is no real way to lose.

AN AWESOME ARSENAL

Rockets

You will want to use these against the ground targets. You will need all 100 because it takes two or three to destroy a target.

Winders

These particular weapons have a tracking ability that makes quick work of enemy aircraft. You are equipped with 24 of these.

Hell Fire

Hell Fire anti-aircraft weapons are just like the Winders except they are more powerful. It only takes one Hell Fire to shoot down a plane, unlike the Winders.

Flack

These will self-destruct, spraying metal fragments into the air. Not only will they shoot down planes, but they can also be used against missile attacks.

Guns

You better hope you don't waste your other weapons. It is nearly impossible to destroy anything with your guns alone.

PLAYER'S NOTES:

FIRST IMPRESSION

I was more impressed by the on-line displays than with the actual game. This was because the game was a bit boring.

BEST FEATURE

The bevy of enemies that you must fight provides intense action.

WHAT'S MISSING

The controls are smooth, but the helicopter is very limited in its mobility. The lack of the ability to gain altitude and aim your nose up or down makes air-to-air combat dull. At times it seems like you are in a hovercraft instead of flying a helicopter.

WILL YOU LIKE IT?

If you like flight simulators, Black Fire will offer you a realistic approach to helicopter flight. However, you may find that the reactions are very similar. This makes the game a little dull.

—Ron Maronick

OPERATION: FIRST STRIKE

The Nation Command Authority has just authorized a limited objective strike against a small terrorist group that calls itself The Consortium. The National Command has decided to target the terrorist's base of operation using one Black Fire helicopter. Your primary mission is to destroy their central com-

mand bunker in the inner compound of the base. The Overlord Spy Satellite has located the base and locked its laser signature into the tactical computer of the Black Fire. Use your radar to help

determine the exact location of your destination. You must find and destroy your target before Federal Law Enforcement Agents arrive. Their lives are in your hands. Fly well.

OPERATION: SILENT FALL

With the Consortium's base of operation out of the way, the task at hand is to now find and destroy those individuals responsible for the training and equipping of this terrorist group. Using the Overlord

Satellite, the Government has located those responsible. A group of terrorists that is helping the Consortium known as the Sword of Gideon has been discovered. Currently this group has established a

convoy that will provide the Consortium with the last of their ordnances. Command Authority has authorized the decommissioning of the Gideon group. Your mission is to prevent the members of the Sword of Gideon from completing this transaction. You are authorized to destroy all transport trucks.

OPERATION: RULES OF ENGAGEMENT

In this mission you are ordered by your commanders to conduct a Nation Command policy enforcement operation within the region of the Gulf of California. Your target is a stolen V-22 Offspray. You must find and destroy the Offspray before it can become airborne. You are given executive sanctions to use whatever force it

likes. This mission is of extreme importance because Overlord has discovered that this plane is used to equip the Gideon. Be aware that this mission is extremely high security and you should

proceed with extreme caution. You will be flying outside of U.S. boundaries. If you are shot down you will be on your own. The Government will forget about your existence.

SATURN

PLAYER'S NOTES:

FIRST IMPRESSION

The cinema that starts this game tells the story and really gets you ready for action. In the first level, I was impressed by the smooth motion and the way your vital information is spread around the screen without being obtrusive.

BEST FEATURE

The best features include the graphics and the control, which are both top-notch. The game also runs very smoothly without the interference of a lot of loading time.

WHAT'S MISSING

Variety plain and simple. After five or so levels, I began to get a little bored. The objective is the same in every level! Find the key and get out. This can get really monotonous.

WILL YOU LIKE IT?

Only hard-core fans of first-person action games will really like this game. If you are expecting a game with a lot of secrets and hidden areas like Doom, you will be disappointed at how straightforward the levels are.

—Paul A. Geeth

Map Data

One of the most important things to find on each level is the computer. When you access it the map of the entire level will be displayed in the upper left-hand corner of your screen.

ROBOTICA

The Key

The objective on each level is the same, find the gate key and move to the next level. Of course that is easier said than done.

Decisions

The levels are laid out like mazes. Choosing which door to go through can mean the difference between finding the key immediately or going through a long, drawn-out search.

Generator

The generator can do things like hover, power up, and refresh. However, the energy in the generator is wasted quickly.

AND SO IT BEGAN...

Fighter ships of unknown origin appeared suddenly from a Hyperspace Station near Starbase Bravo. Within seconds, they fired their weapons at the defenseless space station, rendering her shields useless. The unknown foe transmitted a message to the commander of Starbase Bravo: The message was as follows: "I am Lord Soltek, Supreme Predator of the Draxal Dominion. Your species has been selected for the Hunt. You should regard it as an honor to feed us. We hunt only the quickest and the smartest. What you are about to witness is what we call 'Juk' Fuler...which in your language means 'Sun Decker'. I think you'll find it illuminating!" An "abandon ship" was issued by the commander of Starbase Bravo, and so the war began...

PLAYER'S NOTES:

FIRST IMPRESSION

Well, the 3DO version didn't impress me too much, other than in the graphics department. The PlayStation version got the same lukewarm reception.

BEST FEATURE

The graphics are pretty good; they're smoother and clearer than in its 3DO counterpart.

WHAT'S MISSING

One of the reasons I didn't care for the 3DO version was because it suffered from really shoddy controls, especially in the barrel sequences. It's very difficult to maneuver your fighter without hitting lots of walls. The sound effects got boring real quick, and the music... well, it simply doesn't fit the game. Luckily you can turn both off, but if you turn off the sound FX you miss out on hearing the briefings at the beginning of each mission.

WILL YOU LIKE IT?

Some people might like the visual stimulation that it offers, but I think that many will be turned away from it. The incredibly long and repetitious levels, along with music and sound effects that got really annoying, make it only an average shooter. There are better shooters for the PlayStation.

—Ken Doherty

TOTAL ECLIPSE

WORLD 1: AQUEOUS MAJOR

Scoots have backtracked the path of these missiles to a planet in the Omega Nebula. These missiles have been raining death and destruction upon Earth. You have to wipe them out. Best of luck, lieutenant.

Your shields will go down even if you're not hit by anything. Luckily, your shields replenish themselves every time you hit a Drexel. These two buildings are the easiest to destroy. The one on the left doesn't even fire back! Bonus!

Fly into the blue area to enter a tunnel. Every world has them. Tunnels are somewhat difficult to maneuver through, with many hidden dangers.

This section of wall will change position every few seconds. Good timing is needed to safely navigate this menace.

Pass through these bars for a quick speed boost. Use caution in the tunnels at high speeds!

The Boss for this world has an easy pattern. Nuke him with any Smart Bombs you have then go in for the kill!

WORLD 2: MAGMA PRIME

Drexel cyborgs are wreaking havoc among the human colonies. Go to the Centauri Nebula and destroy any cyborg factory you come across.

These tunnels hold a new surprise: moving walls! Once again, your timing skills are put to the test.

Go through these tunnels at a slow pace. An incredible amount of obstacles are scattered around, and high speed is only asking for trouble.

You'll find some cyborg factories almost as soon as you enter the sector. They only take a few wall-placed hits to destroy. They're not heavily armored.

It's easy to get distracted and plow right into a wall.

The red bars do just the opposite of the green ones.

This Boss is even easier than the first. Launch all of your Smart Bombs, then concentrate your aim on the eyes. He's incredibly easy.

**3DO****KNOW THINE ENEMY**

Meet Genestealer: He hails from a not-too-friendly race of creatures. They have four arms: two with claws and two with human-like hands. Their head is adorned with razor-sharp teeth. They see very fast and multiply by the thousands. Have fun!

Hit Start to get to this screen. Here, you can give orders to each member of your team. Rotate through each member by pressing C. To rotate through the different orders, press B. Once you have a command chosen, position the cursor to the area on the map where you want your character to perform his command. The little bar on the bottom of the screen is your timer. While it's ticking down, real time stops. When the timer runs out, real time continues, regardless if you're in this screen. Once you exit this screen, the timer will start to regenerate. To switch between characters, press C until that character's name appears on the upper left-hand corner of the screen. When you press start again, you will resume play as that character.

A game that's loosely based on Warhammer 40K? That's pretty cool.

BEST FEATURE

The overall strategy involved in this game. You have to think out some of these missions. I played one mission for a total of 27 times before I found the optimal troop dispensing pattern. The intro was nicely done, even if some of the segments dragged.

WHAT'S MISSING

The programming in this game seems to be top-notch, with the definite exception being the "projectile collision programming." Simply put, there seems to be only one "sweet spot" on the Genestealer where your weapons will do any damage. You can hit a Genestealer a billion times, but unless you hit it near the torso, it will keep charging.

IS IT A DOOM**WANNA-BE?**

No. Doom had you run into a room chock-full of demons, blowing them away. Space Hulk requires the player to consider the tactical challenges of team action. This is a great strategy/action game, and an extremely tough one.

-Ken Radzick

You're the ultimate killing machine, part man and part robot. So what comes out when you tickle? Never mind that. Get to the lab and exact your revenge on that twisted scientist.

Enjoy the smell of burnt metal? Good. You'll need to blast hordes of evil mutants like this one in order to survive.

He may look like a waste of good aluminum, but the android will come in handy when things get hairy. He'll send you useful bits of information through your communications about that will help you in your mission. (In other words, don't pump him full of lead.)

If a mad scientist brings you back to life as a part-human, part-robotic killing machine, do you blow him away or call him Daddy?

Iron Angel™
the Apocalypse

Here's a relationship that's even too screwed up for one of those cheesy talk shows. Introducing Iron Angel of the Apocalypse™. A mad scientist has created you, the Iron Angel, from flesh, bone and metal. But he didn't program you to mow his lawns and serve drinks at his parties. He wants you to rid the world of the human race. Luckily, you still have enough brain tissue to realize that the world could do without the lunatic. With the help

of a lovely assortment of big-ass guns, your mission is to blast your way to the scientist's lab on the top floor. If you make it, you can give Pops a Father's Day gift he'll never forget.

of a lovely assortment of big-ass guns, your mission is to blast your way to the scientist's lab on the top floor. If you make it, you can give Pops a Father's Day gift he'll never forget.

SYNERGY

Your mission objective is to flame the room marked E. Have Akhad immediately move to point A. This should take care of any Genestealers coming from the first corridor. Have Ezekiel move directly to point C. Move Azrael to one of the right-hand corners of room B. Sergio provides cover for Azrael as he moves to point D. Have Azrael follow Sergio after he passes. Once in the junction at point D, have Azrael move to the target area in order to flame it. Move Aradiel to point B, simply for backup purposes in case it's needed.

ARADIEL
SERGIO
AZRAEL (F)
EZEKIEL
AKHAD

SUICIDE!

Play as Akhad for the first few seconds, simply because he's the first to make contact with the enemy. Get ready for some close combat.

Sergio leads the way down the second corridor. You might want to play as Sergio at this time. Because if any Genestealers get to Azrael, chances are he'll get killed. The flamer is useless for close combat.

I love the smell of napalm in the morning. Good job!

Unfortunately, the Genestealers killed Akhad. Good thing you have Aradiel in reserve!

The red arrows indicate the points where the Genestealer swarms come from. Be wary.

EXTERMINATE

This mission is a doozy. At least three Terminators must survive for a total of five minutes. Your best bet would be to get as many Terminators as possible into a room with few doors in it. Unfortunately, your Terminators are scattered around. The trip will be easier for some more than others. Expect to lose a few people here. One method that generally works is to get as many Terminators into a room as possible, like room A. Have one Terminator face toward corridor B and another one facing corridor C. This should cover all points of entry for the Genestealers. Ezekiel, armed with a flamer that's only half full, is all but useless in this mission. Try to move him into the corridor where Sergio started, so as to get him out of the way. Another method that has had limited results is a bit more complicated, and it involves a lot of jumping between screens: Have Aradiel move to point E, and Azrael move to point D. The trick here is to set up a crossfire in the corridor window, separating anything that wanders in there. Have Sergio cut into room A, but keep him clear of corridor B. So that Ezekiel and (hopefully!) Akhad can pass. Once clear of the incoming Terminators, move Sergio out into corridor C, with Akhad providing cover should Sergio fall. When you first enter this mission it would be a good idea to play as Akhad, because he's the first to make contact with the enemy. Unfortunately, Akhad is usually overwhelmed with the entire and he usually dies. Use whichever methods suit you best. Good luck!

**MIGHTY MORPHIN
POWER RANGERS
THE MOVIE**

Choose to play as any one of the six Power Rangers.

Gather power-ups to transform into a Power Ranger.

Level 1

PLAYER'S NOTES:

FIRST IMPRESSION

The first thing I noticed is the simplicity and straightforwardness of this side-scrolling action title with little hidden under the surface to enhance the plot. The first few minutes of play reflect the rest of the stages.

BEST FEATURE

The ability to change into a Power Ranger and use the power-packed sliding elbow to finish off enemies with one hit. Mid-Bosses in select stages also add some variety to this cart.

WHAT'S MISSING

Moves: Your attacks are limited to a few simplistic moves that get old quickly. All of the Rangers attack in the same manner without a special move. After completing stages with one character, there is no reason to try another.

WILL YOU LIKE IT?

Compulsive Power Ranger fans may find some enjoyment battling hordes of evil-doers. I think experienced gamers should bypass this one. It is apparently directed at only the youngest of audiences.

—Scott Parus

Attack this Boss while staying away from his lightning bolts.

The Power Rangers are back and ready to battle on your Game Boy. Eliminating enemies and gathering lightning bolt power-ups allow you to transform your character into a Power Ranger. With double strength, you fight your way through six stages of nasties controlled by Bosses and Mid-Bosses. Gather your wits as you jump into the shoes of your favorite Ranger to conquer Ivan Ooze and his minions.

Find safety above this sword-wielding Boss.

32X

The 32X had a small but decent line-up. Sega has purchased the rights to several games including *Star Trek: Starfleet Academy*, *Primal Rage* and *T-Mek*. They also had an original title called *Kolibri* on display.

Kolibri is a shooter where the player controls a hummingbird. It looks similar visually to *Echo the Dolphin*. This could be the game that was people over to the 32X.

T-Mek is a popular arcade game where players compete in hover tanks in an arena. *T-Mek* is loaded with strategy and secrets.

Primal Rage is a well-known coin-op game that features digitized dinosaurs tearing into each other. It looks like a decent lineup.

VF 2

VIRTUA COP

Sega had *Virtua Fighter 2* and *Virtua Cop* on display. VF2 was still early, as it was just a running demo. *Virtua Cop*, however, was playable. You can use the gun packaged with the game or use the controller. It's a direct coin-op in every way.

SEGA

unplugged

Sega Unplugged: the special day where the various magazines were invited to see the latest Sega products. We sent two editors, Andrew Baran and John Stockhausen, to find out what was in store for the world of Sega. The first two days concentrated on the first-party software. These covered all of the formats from Saturn to 32X. The third day was reserved for Sega's licensees, and 18 companies were there to show off their wares. Here is a small glimpse at what was there. Look for extended coverage in the next issue of **EGM**.

The Sega Sports lineup was very impressive. **World Series Baseball** had great voice and graphics. It could possibly be the best baseball game on a home system ever! Sega's other title, **NHL All-Star Hockey**, looks great and can have up to 12 players at once!

NHL ALL-STAR HOCKEY

WORLD SERIES BASEBALL

Sega has announced that **Sega Rally Championship** will be coming to the States. This game contains three tracks, four different viewpoints and off-road racing. This is going to be a near-exact translation of the coin-op.

SEGA RALLY

Sega has a number of other games in the works: **Ghen War**, a mech game; a 3-D action game based on the movie **Congo**; **Wing Arms**, an awesome flight sim and a strategy/RPG called **Mystaria**.

MANSSION OF HIDDEN SOULS

NBA JAM:TE

Acclaim had three titles up and running at Sega Unplugged. Mortal Kombat II was a near-perfect translation. You just have to see how close it is.

NFL QUARTERBACK CLUB '96

There were 18 companies present with games on display. Some were new, but a couple we've seen before. Here's a list of some of the Saturn titles that were shown or announced: Acclaim had an excellent version of MK2. NBA Jam:TE and NFL Quarterback Club '96 was also present. Maxis had Sim City 2000, while Data East had Dark Legends. Playmates had a demo of Skeleton Warriors, based on the toy line. Viscom set out to puzzle players with Zoop. The wonderful folks at Crystal Dynamics showed 3D Baseball '95, and a bunch of 3DO translations. Capcom had Fox Hunt, and announced Dark Stalkers Revenge and Street Fighter Legends. Look in the next issue for more extended coverage!

Nomad

The folks at Sega decided to spring the Nomad on us to get our opinion. The system itself is slightly larger and a little bit heavier than the Game Gear. The screen resolution is much better, being comparable to that of the Turbo Express. Games fit right in the bezel. The small screen makes the smaller icons harder to read, but the text in some of the game is intelligible. While the game wasn't in hand, I'd say that it would be able to display Phantasy Star 2 well enough. I did test out the unit with the games X-Men and Comix Zone. The Nomad controls are responsive and it feels right.

The Nomad should be released early December, and will retail for around \$199.00. The machine uses six double A batteries and it consumes them in an astonishing three hours. The Game Gear DC power adapter will work with the unit. A TV adapter is also in the works.

Overall I'd have to say that as long as Sega keeps the price down, the Nomad will be a success. I'm certainly looking forward to playing Strider on the run. I'm just wondering if Sega will give the Game Gear a quiet death once this thing becomes mainstream. So far, the Nomad looks pretty hot.

The famed Mario RPG is now a reality! This title is the responsibility of Square and Nintendo together, and look what they've done. Featuring fully rendered graphics, this title is boosted by adding such classic Mario elements as jumping on enemies and hitting floating blocks with your head for power-ups (Tentatively, it is unknown if it is Menu Combat or actual action elements.)

Will this title make it to the U.S.? With the popularity of Mario, it probably will!

Sega Saturn Version

TSD (version 1.5) features newly detailed backgrounds, and many of the characters from the PSX version plus a new one. This new is armed with a staff and looks like Kayin.

PlayStation Version

Details are still sketchy, but here's a comparison of the PSX and an early Sega Saturn version. It will come out in the U.S., around January from either Sega or Takara.
